Colophon

This publication is to be used primarily in support of instructing military personnel as part of the Defense Language Program (resident and nonresident). Inquiries concerning the use of materials, including requests for copies, should be addressed to:

Defense Language Institute
Foreign Language Center
Nonresident Training Division
Presidio of Monterey, CA 93944-5006

Topics in the areas of politics, international relations, mores, etc., which may be considered as controversial from some points of view, are sometimes included in the language instruction for DLIFLC students since military personnel may find themselves in positions where a clear understanding of conversations or written materials of this nature will be essential to their mission. The presence of controversial statements -- whether real or apparent -- in DLIFLC materials should not be construed as representing the opinions of the writers, the DLIFLC, or the Department of Defense.

Actual brand names and businesses are sometimes cited in DLIFLC instructional materials to provide instruction in pronunciations and meanings. The selection of such proprietary terms and names is based solely on their value for instruction in the language. It does not constitute endorsement of any product or commercial enterprise, nor is it intended to invite a comparison with other brand names and businesses not mentioned.

In DLIFLC publications, the words he, him, and/or his denote both masculine and feminine genders. This statement does not apply to translations of foreign language texts.

The DLIFLC may not have full rights to the materials it produces. Purchase by the customer does not constitute authorization for reproduction, resale, or showing for profit. Generally, products distributed by the DLIFLC may be used in any not-for-profit setting without prior approval from the DLIFLC.

Preface

Standard Chinese: A Modular Approach originated in an inter-agency conference held at the Foreign Service Institute in August 1973 to address the need generally felt in the U.S. Government language training community for improving and updating Chinese materials, to reflect current usage in Beijing and Taipei.

The conference resolved to develop materials which were flexible enough in form and content to meet the requirements of a wide range of government agencies and academic institutions.

A Project Board was established consisting of representatives of the Central Intelligence Agency Language Learning Center, the Defense Language Institute, the State Department's Foreign Service Institute, the Cryptologic School of the National Security Agency, and the U.S. Office of Education, later joined by the Canadian Forces Foreign Language School. The representatives have included Arthur T. McNeill, John Hopkins, and John Boag (CIA); Colonel John F. Elder III, Joseph C. Hutchinson, Ivy Gibian, and Major Bernard Muller-Thym (DLI); James R. Frith and John B. Ratliff III (FSI); Kazuo Shitama (NSA); Richard T. Thompson and Julia Petrov (OE); and Lieutenant Colonel George Kozoriz (CFFLS).

The Project Board set up the Chinese Core Curriculum Project in 1974 in space provided at the Foreign Service Institute. Each of the six U.S. and Canadian government agencies provided funds and other assistance.

Gerard P. Kok was appointed project coordinator, and a planning council was formed consisting of Mr. Kok, Frances Li of the Defense Language Institute, Patricia O'Connor of the University of Texas, Earl M. Rickerson of the Language Learning Center, and James Wrenn of Brown University. In the fall of 1977, Lucille A. Barale was appointed deputy project coordinator. David W. Dellinger of the Language Learning Center and Charles R. Sheehan of the Foreign Service Institute also served on the planning council and contributed material to the project. The planning council drew up the original overall design for the materials and met regularly to review their development.

Writers for the first half of the materials were John H. T. Harvey, Lucille A. Barale, and Roberta S. Barry, who worked in close cooperation with the planning council and with the Chinese staff of the Foreign Service Institute. Mr. Harvey developed the instructional formats of the comprehension and production self-study materials, and also designed the communications classroom activities and wrote the teacher's guides. Lucille A. Barale and Roberta S. Barry wrote the tape scripts and the student text. By 1978 Thomas E. Madden and Susan C. Pola had joined the staff. Led by Ms. Barale, they have worked as a team to produce the materials subsequent to Module 6.

All Chinese language material was prepared or selected by Chuan O. Chao, Ying-chi Chen, Hsiao-Jung Chi, Eva Diao, Jan Hu, Tsung-mi Li, and Yunhui C. Yang, assisted for part of the time by Chieh-fang Ou Lee, Ying-ming Chen, and Joseph Yu Hsu Wang. Anna Affholder, Mei-li Chen, and Henry Khuo helped in the preparation of a preliminary corpus of dialogues.

Administrative assistance was provided at various times by Vincent Basciano, Lisa A. Bowden, Jill W. Ellis, Donna Fong, Renee T. C. Liang, Thomas E. Madden, Susan C. Pola, and Kathleen Strype.

The production of tape recordings was directed by Jose M. Ramirez of the Foreign Service Institute Recording Studio. The Chinese script was voiced by Ms. Chao, Ms. Chen, Mr. Chen, Ms. Diao, Ms. Hu, Mr. Khuo, Mr. Li, and Ms. Yang.

The English script was read by Ms. Barale, Ms. Barry, Mr. Basciano, Ms. Ellis, Ms. Pola, and Ms. Strype.

The graphics were produced by John McClelland of the Foreign Service Institute Audio-Visual staff, under the general supervision of Joseph A. Sadote, Chief of Audio-Visual.

Standard Chinese: A Modular Approach was field-tested with the cooperation of Brown University; the Defense Language Institute, Foreign Language Center; the Foreign Service Institute; the Language Learning Center; the United States Air Force Academy; the University of Illinois; and the University of Virginia.

Colonel Samuel L. Stapleton and Colonel Thomas G. Foster, Commandants of the Defense Language Institute, Foreign Language Center, authorized the DLIFLC support necessary for preparation of this edition of the course materials. This support included coordination, graphic arts, editing, typing, proofreading, printing, and materials necessary to carry out these tasks.

Introduction

About the course

This course is designed to give you a practical command of spoken Standard Chinese. You will learn both to understand and to speak it. Although Standard Chinese is one language, there are differences between the particular form it takes in Beijing and the form it takes in the rest of the country. There are also, of course, significant non-linguistic differences between regions of the country. Reflecting these regional differences, the settings for most conversations are Beijing and Taipei.

This course represents a new approach to the teaching of foreign languages. In many ways it redefines the roles of teacher and student, of classwork and homework, and of text and tape. Here is what you should expect:

- The focus is on communicating in Chinese in practical situations — the obvious ones you will encounter upon arriving in China. You will be communicating in Chinese most of the time you are in class. You will not always "be talking about real situations," but you will almost always be purposefully exchanging information in Chinese.
- This focus on communicating means that the teacher is first of all your conversational partner. Anything that forces him¹ back into the traditional roles of lecturer and drill-master limits your opportunity to interact with a speaker of the Chinese language and to experience the language in its full spontaneity, flexibility, and responsiveness.
- Using class time for communicating, you will complete other course activities out of class whenever possible. This is what the tapes are for. They introduce the new material of each unit and give you as much additional practice as possible without a conversational partner.
- The texts summarize and supplement the tapes, which take you through new material step by step and then give you intensive practice on what you have covered. In this course you will spend almost all your time listening to Chinese and saying things in Chinese, either with the tapes or in class.

How the Course Is Organized

The subtitle of this course, "A Modular Approach," refers to overall organization of the materials into MODULES which focus on particular situations or language topics and which allow a certain amount of choice as to what is taught and in what order. To highlight equally significant features of the course, the subtitle could just as well have been "A Situational Approach," "A Taped-Input Approach," or "A Communicative Approach."

Ten situational modules form the core of the course:

ORIENTATION (ORN)

Talking about who you are and where you are from.

¹As used in this course, the words "he," "him," and "Ms" are intended to include both masculine and feminine genders. (Translations of foreign language material not included.)

BIOGRAPHIC INFORMATION (BIO)	Talking about your background, family, studies, and occupation and about your visit to China.
MONEY (MON)	Making purchases and changing money.
DIRECTIONS (DIR)	Asking directions in a city or in a building.
TRANSPORTATION (TRN)	Taking buses, taxis, trains, and planes, including finding out schedule information, buying tickets, and making reservations.
ARRANGING A MEETING (MTG)	Arranging a business meeting or a social get-together, changing the time of an appointment, and declining an invitation.
SOCIETY (SOC)	Talking about families, relationships between people, cultural roles in traditional society, and cultural trends in modern society.
TRAVELING IN CHINA (TRL)	Making travel arrangements and visiting a kindergarten, the Great Wall, the Ming Tombs, a commune, and a factory.
LIFE IN CHINA (LIC)	Talking about daily life in Beijing street committees, leisure activities, traffic and transportation, buying and rationing, housing.
TALKING ABOUT THE NEWS (TAN)	Talking about government and party policy changes described in newspapers the educational system agricultural policy, international policy, ideological policy, and policy in the arts.

Each core module consists of tapes, a student textbook, and a workbook.

In addition to the ten CORE modules, there are also RESOURCE modules and OPTIONAL modules. Resource modules teach particular systems in the language, such as numbers and dates. As you proceed through a situational core module, you will occasionally take time out to study part of a resource module. (You will begin the first three of these while studying the Orientation Module.)

PRONUNCIATION AND ROMANIZATION (P&R)	The sound system of Chinese and the Pinyin system of romanization.
NUMBERS (NUM)	Numbers up to five digits.
CLASSROOM EXPRESSIONS (CE)	Expressions basic to the classroom learning situation.
TIME AND DATES (T&D)	Dates, days of the week, clock time, parts of the day.
GRAMMAR	Aspect and verb types, word order, multisyllabic verbs and auxiliary verbs, complex sentences, adverbial expressions.

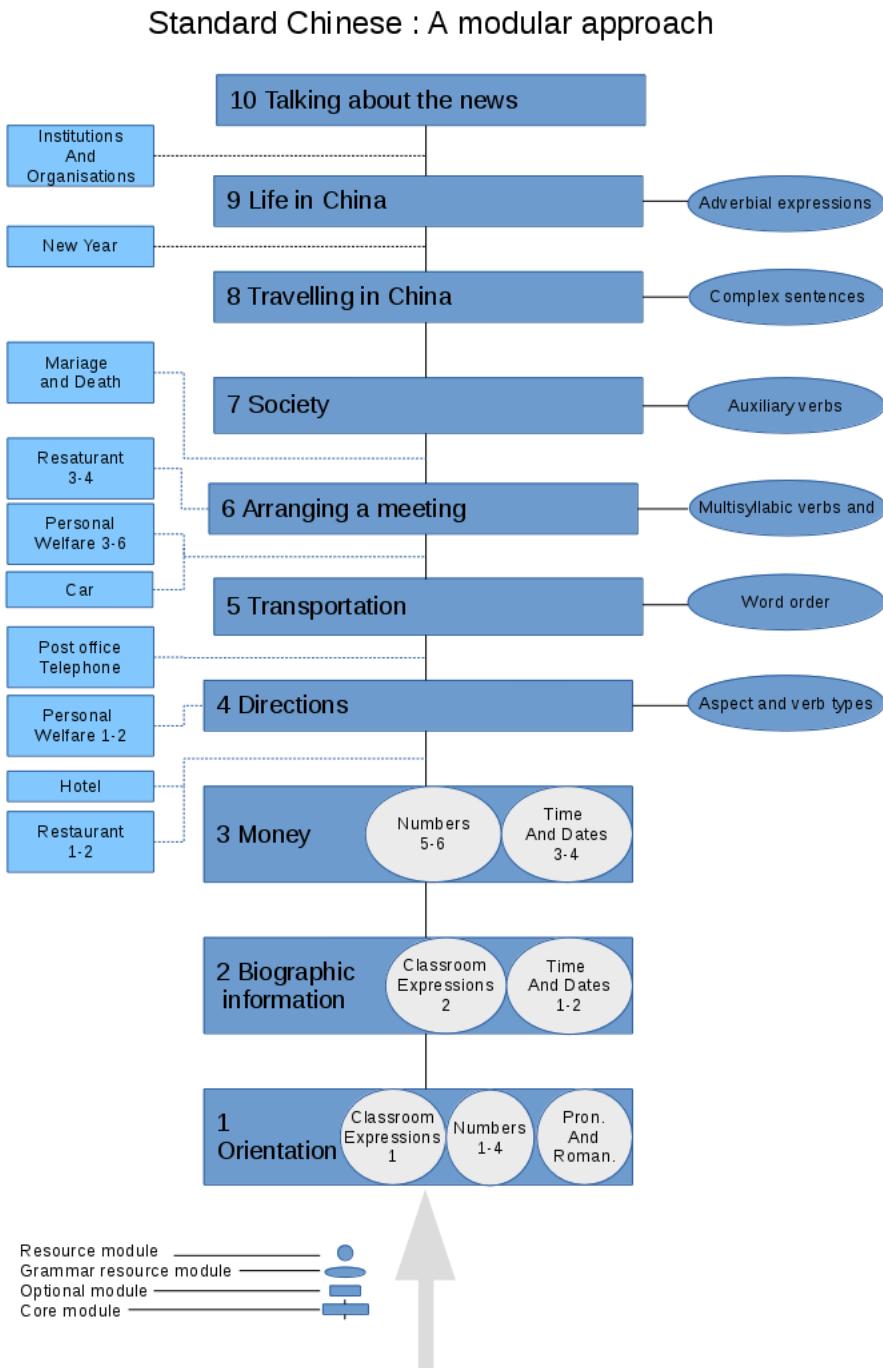

Each module consists of tapes and a student textbook.

The eight optional modules focus on particular situations:

- RESTAURANT (RST)
- HOTEL (HTL)
- PERSONAL WELFARE (WLF)
- POST OFFICE AND TELEPHONE (PST/TEL)
- CAR (CAR)
- CUSTOMS SURROUNDING MARRIAGE, BIRTH, MD DEATH (MBD)
- NEW YEAR'S CELEBRATION (NYH)
- INSTITUTIONS AND ORGANIZATIONS (I&O)

Each module consists of tapes and a student textbook. These optional modules may be used at any time after certain core modules,

The diagram on page ??? shows how the core modules, optional modules, and resource modules fit together in the course. Resource modules are shown where study should begin. Optional modules are shown where they may be introduced.

Inside a Core Module

Each core module has from four to eight units. A module also includes:

- Objectives: The module objectives are listed at the beginning of the text for each module. Read these before starting work on the first unit to fix in your mind what you are trying to accomplish and what you will have to do to pass the test at the end of the module.
- Target Lists: These follow the objectives in the text. They summarize the language content of each unit in the form of typical questions and answers on the

topic of that unit. Each sentence is given both in romanized Chinese and in English. Turn to the appropriate Target List before, during, or after your work on a unit, whenever you need to pull together what is in the unit.

- Review Tapes (R-1): The Target List sentences are given on these tapes. Except in the short Orientation Module, there are two R-1 tapes for each module.
- Criterion Test: After studying each module, you will take a Criterion Test to find out which module objectives you have met and which you need to work on before beginning to study another module.

Inside a Unit

Here is what you will be doing in each unit. First, you will work through two tapes:

1. Comprehension Tape 1 (C-1): This tape introduces all the new words and structures in the unit and lets you hear them in the context of short conversational exchanges. It then works them into other short conversations and longer passages for listening practice, and finally reviews them in the Target List sentences. Your goal when using the tape is to understand all the Target List sentences for the unit.
2. Production Tape 1 (P-1): This tape gives you practice in pronouncing the new words and in saying the sentences you learned to understand on the C-1 tape. Your goal when using the P-1 tape is to be able to produce any of the Target List sentences in Chinese when given the English equivalent.

The C-1 and P-1 tapes, not accompanied by workbooks, are "portable," in the sense that they do not tie you down to your desk. However, there are some written materials for each unit which you will need to work into your study routine. A text Reference List at the beginning of each unit contains the sentences from the C-1 and P-1 tapes. It includes both the Chinese sentences and their English equivalents. The text Reference Notes restate and expand the comments made on the C-1 and P-1 tapes concerning grammar, vocabulary, pronunciation, and culture. After you have worked with the C-1 and P-1 tapes, you go on to two class activities:

3. Target List Review: In this first class activity of the unit, you find out how well you learned the C-1 and P-1 sentences. The teacher checks your understanding and production of the Target List sentences. He also presents any additional required vocabulary items, found at the end of the Target List, which were not on the C-1 and P-1 tapes.
4. Structural Buildup: During this class activity, you work on your understanding and control of the new structures in the unit. You respond to questions from your teacher about situations illustrated on a chalkboard or explained in other ways.

After these activities, your teacher may want you to spend some time working on the drills for the unit.

5. Drill Tape: This tape takes you through various types of drills based on the Target List sentences and on the additional required vocabulary.
6. Drills: The teacher may have you go over some or all of the drills in class, either to prepare for work with the tape, to review the tape, or to replace it.

Next, you use two more tapes. These tapes will give you as much additional practice as possible outside of class.

7. Comprehension Tape 2 (C-2): This tape provides advanced listening practice with exercises containing long, varied passages which fully exploit the possibilities of the material covered. In the C-2 Workbook you answer questions about the passages.

8. Production Tape 2 (P-2): This tape resembles the Structural Buildup in that you practice using the new structures of the unit in various situations. The P-2 Workbook provides instructions and displays of information for each exercise.

Following work on these two tapes, you take part in two class activities:

9. Exercise Review: The teacher reviews the exercises of the C-2 tape by reading or playing passages from the tape and questioning you on them. He reviews the exercises of the P-2 tape by questioning you on information displays in the P-2 Workbook.

10 Communication Activities: Here you use what you have learned in the unit for the purposeful exchange of information. Both fictitious situations (in Communication Games) and real-world situations involving you and your classmates (in "interviews") are used.

Background Notes: About Chinese

The Chinese Languages

We find it perfectly natural to talk about a language called "Chinese." We say, for example, that the people of China speak different dialects of Chinese, and that Confucius wrote in an ancient form of Chinese. On the other hand, we would never think of saying that the people of Italy, France, Spain, and Portugal speak dialects of one language, and that Julius Caesar wrote in an ancient form of that language. But the facts are almost exactly parallel.

Therefore, in terms of what we think of as a language when closer to home, "Chinese" is not one language, but a family of languages. The language of Confucius is partway up the trunk of the family tree. Like Latin, it lived on as a literary language long after its death as a spoken language in popular use. The seven modern languages of China, traditionally known as the "dialects," are the branches of the tree. They share as strong a family resemblance as do Italian, French, Spanish, and Portuguese, and are about as different from one another.

The predominant language of China is now known as [Pǔtōnghuà](#), or "Standard Chinese" (literally "the common speech"). The more traditional term, still used in Taiwan, is [Guóyǔ](#), or "Mandarin" (literally "the national language"). Standard Chinese is spoken natively by almost two-thirds of the population of China and throughout the greater part of the country.

The term "Standard Chinese" is often used more narrowly to refer to the true national language which is emerging. This language, which is already the language of all national broadcasting, is based primarily on the Peking dialect, but takes in elements from other dialects of Standard Chinese and even from other Chinese languages. Like many national languages, it is more widely understood than spoken, and is often spoken with some concessions to local speech, particularly in pronunciation.

The Chinese languages and their dialects differ far more in pronunciation than in grammar and vocabulary. What distinguishes Standard Chinese most from the other Chinese languages, for example, is that it has the fewest tones and the fewest final consonants.

The remaining six Chinese languages, spoken by approximately a quarter of the population of China, are tightly grouped in the southeast, below the Yangtze River. The six are: the Wu group ([Wú](#)), which includes the "Shanghai dialect"; Hunanese ([Xiāng](#)); the "Kiangsi dialect" ([Gàn](#)); Cantonese ([Yuè](#)), the language of [Guǎngdōng](#), widely spoken in Chinese communities in the United States; Fukienese ([Mǐn](#)), a variant of which is spoken by a majority on Taiwan and hence called Taiwanese; and Hakka ([Kèjīā](#)), spoken in a belt above the Cantonese area, as well as by a minority on Taiwan. Cantonese, Fukienese, and Hakka are also widely spoken throughout Southeast Asia.

There are minority ethnic groups in China who speak non-Chinese languages. Some of these, such as Tibetan, are distantly related to the Chinese languages. Others, such as Mongolian, are entirely unrelated.

Some Characteristics of Chinese

To us, perhaps the most striking feature of spoken Chinese is the use of variation in tone ("tones" to distinguish the different meanings of syllables which would

otherwise sound alike. All languages, and Chinese is no exception, make use of sentence intonation to indicate how whole sentences are to be understood. In English, for example, the rising pattern in "He's gone?" tells us that the sentence is meant as a question. The Chinese tones, however, are quite a different matter. They belong to individual syllables, not to the sentence as a whole. An inherent part of each Standard Chinese syllable is one of four distinctive tones. The tone does just as much to distinguish the syllable as do the consonants and vowels. For example, the only difference between the verb "to buy," **mǎi** and the verb "to sell," **mài**, is the Low tone (#) and the Falling tone (`). And yet these words are just as distinguishable as our words "buy" and "guy," or "buy" and "boy." Apart from the tones, the sound system of Standard Chinese is no more different from English than French is.

Word formation in Standard Chinese is relatively simple. For one thing, there are no conjugations such as are found in many European languages. Chinese verbs have fewer forms than English verbs, and nowhere near as many irregularities. Chinese grammar relies heavily on word order, and often the word order is the same as in English. For these reasons Chinese is not as difficult for Americans to learn to speak as one might think.

It is often said that Chinese is a monosyllabic language. This notion contains a good deal of truth. It has been found that, on the average, every other word in ordinary conversation is a single-syllable word. Moreover, although most words in the dictionary have two syllables, and some have more, these words can almost always be broken down into single-syllable units of meaning, many of which can stand alone as words.

Written Chinese

Most languages with which we are familiar are written with an alphabet. The letters may be different from ours, as in the Greek alphabet, but the principle is the same: one letter for each consonant or vowel sound, more or less. Chinese, however, is written with "characters" which stand for whole syllables -- in fact, for whole syllables with particular meanings. Although there are only about thirteen hundred phonetically distinct syllables in standard Chinese, there are several thousand Chinese characters in everyday use, essentially one for each single-syllable unit of meaning. This means that many words have the same pronunciation but are written with different characters, as **tiān**, "sky," 天, and **tiān**, "to add," "to increase," 添. Chinese characters are often referred to as "ideographs" which suggests that they stand directly for ideas. But this is misleading. It is better to think of them as standing for the meaningful syllables of the spoken language.

Minimal literacy in Chinese calls for knowing about a thousand characters. These thousand characters, in combination, give a reading vocabulary of several thousand words. Full literacy calls for knowing some three thousand characters. In order to reduce the amount of time needed to learn characters, there has been a vast extension in the People's Republic of China (PRC) of the principle of character simplification, which has reduced the average number of strokes per character by half.

During the past century, various systems have been proposed for representing the sounds of Chinese with letters of the Roman alphabet. One of these romanizations, **Hànyǔ Pīnyīn** (literally "Chinese Language Spelling," generally called "Pinyin" in English), has been adopted officially in the PRC, with the short-term goal of teaching all students the Standard Chinese pronunciation of characters. A long-range goal is the use of Pinyin for written communication throughout the country. This is not possible, of course, until speakers across the nation have

uniform pronunciations of Standard Chinese. For the time being, characters, which represent meaning, not pronunciation, are still the most widely accepted way of communicating in writing.

Pinyin uses all of the letters in our alphabet except "v," and adds the letter "ü." The spellings of some of the consonant sounds are rather arbitrary from our point of view, but for every consonant sound there is only one letter or one combination of letters, and vice versa. You will find that each vowel letter can stand for different vowel sounds, depending on what letters precede or follow it in the syllable. The four tones are indicated by accent marks over the vowels, and the Neutral tone by the absence of an accent mark:

High: **mā**

Falling: **mà**

Rising: **má**

Neutral: **ma**

Low: **mǎ**

One reason often given for the retention of characters is that they can be read, with the local pronunciation, by speakers of all the Chinese languages. Probably a stronger reason for retaining them is that the characters help keep alive distinctions of meaning between words, and connections of meaning between words, which are fading in the spoken language. On the other hand, a Cantonese could learn to speak Standard Chinese, and read it alphabetically, at least as easily as he can learn several thousand characters.

Pinyin is used throughout this course to provide a simple written representation of pronunciation. The characters, which are chiefly responsible for the reputation of Chinese as a difficult language, are taught separately.

BACKGROUND NOTES: ABOUT CHINESE CHARACTERS

Each Chinese character is written as a fixed sequence of strokes. There are very few basic types of strokes, each with its own prescribed direction, length, and contour. The dynamics of these strokes as written with a brush, the classical writing instrument, show up clearly even in printed characters. You can tell from the varying thickness of the stroke how the brush met the paper, how it swooped, and how it lifted; these effects are largely lost in characters written with a ball-point pen.

The sequence of strokes is of particular importance. Let's take the character for "mouth," pronounced **kǒu**. Here it is as normally written, with the order and directions of the strokes indicated.

Figure 2. Strokes order

If the character is written rapidly, in "running-style writing," one stroke glides into the next, like this.

Figure 3. Running style writing

If the strokes were written in any but the proper order, quite different distortions would take place as each stroke reflected the last and anticipated the next, and the character would be illegible.

The earliest surviving Chinese characters, inscribed on the Shang Dynasty "oracle bones" of about 1500 B.C. , already included characters that went beyond simple pictorial representation. There are some characters in use today which are pictorial, like the character for "mouth." There are also some which are directly symbolic, like our Roman numerals I, II, and III. (The characters for these numbers — the first numbers you learn in this course — are like the Roman numerals turned on their sides.) There are some which are indirectly symbolic, like our Arabic numerals 1,2, and 3. But the most common type of character is complex, consisting of two parts: a "phonetic," which suggests the pronunciation, and a "radical," which broadly characterizes the meaning. Let's take the following character as an example.

Figure 4. Running style writing

This character means "ocean" and is pronounced [yáng](#). The left side of the character, the three short strokes, is an abbreviation of a character which means "water" and is pronounced [shuǐ](#). This is the "radical." It has been borrowed only for its meaning, "water." The right side of the character above is a character which means "sheep" and is pronounced yang. This is the "phonetic." It has been borrowed only for its sound value, [yáng](#). A speaker of Chinese encountering the above character for the first time could probably figure out that the only Chinese word that sounds like [yáng](#) and means something like "water," is the word [yáng](#) meaning "ocean," We, as speakers of English, might not be able to figure it out. Moreover, phonetics and radicals seldom work as neatly as in this example. But we can still learn to make good use of these hints at sound and sense.

Many dictionaries classify characters in terms of the radicals. According to one of the two dictionary systems used, there are 176 radicals; in the other system, there are 214. There are over a thousand phonetics.

Chinese has traditionally been written vertically, from top to bottom of the page, starting on the right-hand side, with the pages bound so that the first page is where we would expect the last page to be. Nowadays, however, many Chinese

publications paginate like Western publications, and the characters are written horizontally, from left to right.

BACKGROUND NOTES: ABOUT CHINESE PERSONAL NAMES AND TITLES

A Chinese personal name consists of two parts: a surname and a given name. There is no middle name. The order is the reverse of ours: surname first, given name last.

The most common pattern for Chinese names is a single-syllable surname followed by a two-syllable given name:²

Máo Zédōng (Mao Tse-tung)

Zhōu Enlái (Chou En-lai)

Jiǎng Jièshí (Chiang Kai-shek)

Sòng Qìnglíng (Soong Ch'ing-ling --- Mme Sun Yat-sen)

Sòng Mèilíng (Soong Mei-ling--Mme Chiang Kai-shek)

It is not uncommon, however, for the given name to consist of a single syllable:

Zhǔ Dě (Chu Teh)

Lín Biāo (Lin Piao)

Hú Shì (Hu Shih)

Jiang Qǐng (Chiang Ch'ing—Mme Mao Tse-tung)

There are a few two-syllable surnames.

These are usually followed by single-syllable given names:

Sīmǎ Guāng (Ssu-ma Kuang)

Ōuyáng Xiū (Ou-yang Hsiu)

Zhūgě Liàng (Chu-ke Liang)

But two-syllable surnames may also be followed by two-syllable given names:

Sīmǎ Xiāngrú (Ssu-ma Hsiang-ju)

An exhaustive list of Chinese surnames includes several hundred written with a single character and several dozen written with two characters. Some single-syllable surnames sound exactly alike although written with different characters, and to distinguish them, the Chinese may occasionally have to describe the character or "write" it with a finger on the palm of a hand. But the surnames that you are likely to encounter are fewer than a hundred, and a handful of these are so common that they account for a good majority of China's population.

Given names, as opposed to surnames, are not restricted to a limited list of characters, Men's names are often but not always distinguishable from women's; the difference, however, usually lies in the meaning of the characters and so is not readily apparent to the beginning student with a limited knowledge of characters.

²The first version of each example is in the Pinyin system of romanization. The second parenthesized version is the conventional, or anglicized, spelling.

Outside the People's Republic the traditional system of titles is still in use. These titles closely parallel our own "Mr.," "Mrs.," and "Miss." Notice, however, that all Chinese titles follow the name — either the full name or the surname alone — rather than preceding it.

The title "Mr." is **Xiānsheng**.

Mǎ Xiānsheng

Mǎ Mínglǐ Xiānsheng

The title "Mrs." is **Tàitai**. It follows the husband's full name or surname alone.

Mǎ Tàitai

Mǎ Mínglǐ Tàitai

The title "Miss" is **Xiāojiě**. The Ma family's grown daughter, **Défēn**, would be

Mǎ Xiāojiě

Mǎ Défēn Xiāojiě

Even traditionally, outside the People's Republic, a married woman does not take her husband's name in the same sense as in our culture. If Miss Fang **Bǎolán** marries Mr. **Ma Mínglǐ**, she becomes Mrs. **Mǎ Mínglǐ**, but at the same time she remains **Fāng Bǎolán**. She does not become **Mǎ Bǎolán**; there is no equivalent of "Mrs. Mary Smith." She may, however, add her husband's surname to her own full name and refer to herself as **Mǎ Fāng Bǎolán**. At work she is quite likely to continue as Miss **Fāng**.

These customs regarding names are still observed by many Chinese today in various parts of the world. The titles carry certain connotations, however, when used in the PRC today: **Tàitai** should not be used because it designates that woman as a member of the leisure class. **Xiāojiě** should not be used because it carries the connotation of being from a rich family.

In the People's Republic, the title "Comrade," **Tóngzhì** is used in place of the titles **Xiānsheng**, **Tàitai**, and **Xiāojiě**. **Mǎ Mínglǐ** would be:

Mǎ Tóngzhì

Mǎ Mínglǐ Tóngzhì

The title "Comrade" is applied to all, regardless of sex or marital status. A married woman does not take her husband's name in any sense. **Mǎ Mínglǐ**'s wife would be:

Fāng Tóngzhì

Fāng Bǎolán Tóngzhì

Children may be given either the mother's or the father's surname at birth. In some families one child has the father's surname, and another child has the mother's surname. **Mǎ Mínglǐ**'s and **Fāng Bǎolán**'s grown daughter could be

Mǎ Tóngzhì

Mǎ Défēn Tóngzhì

Their grown son could be

Fāng Tóngzhì

Fāng Zìqiáng Tóngzhì

Both in the PRC and elsewhere, of course, there are official titles and titles of respect in addition to the common titles we have discussed here. Several of these will be introduced later in the course.

The question of adapting foreign names to Chinese calls for special consideration. In the People's Republic the policy is to assign Chinese phonetic equivalents to foreign names. These approximations are often not as close phonetically as they might be, since the choice of appropriate written characters may bring in non-phonetic considerations. (An attempt is usually made when transliterating to use characters with attractive meanings.) For the most part, the resulting names do not at all resemble Chinese names. For example, the official version of "David Anderson" is [Dàiwěi Āndésēn](#).

An older approach, still in use outside the PRC, is to construct a valid Chinese name that suggests the foreign name phonetically. For example, "David Anderson" might be [An Dàwèi](#).

Sometimes, when a foreign surname has the same meaning as a Chinese surname, semantic suggestiveness is chosen over phonetic suggestiveness. For example, [Wáng](#), a common Chinese surname, means "king," so "Daniel King" might be rendered [Wáng Dànián](#).

Students in this course will be given both the official PRC phonetic equivalents of their names and Chinese-style names.

Module 1: Orientation

The Orientation Module and associated resource modules provide the linguistic tools needed to begin the study of Chinese. The materials also introduce the teaching procedures used in this course.

The Orientation Module is not a typical course module in several respects. First, it does not have a situational topic of its own, but rather leads into the situational topic of the following module — Biographic Information. Second, it teaches only a little Chinese grammar and vocabulary. Third, two of the associated resource modules (Pronunciation and Romanization, Numbers) are not optional; together with the Orientation Module, they are prerequisite to the rest of the course.

Objectives

Upon successful completion of this module and the two associated resource modules, the student should:

1. Distinguish the sounds and tones of Chinese well enough to be able to write the **Hànyǔ Pīnyīn** romanization for a syllable after hearing the syllable.
2. Be able to pronounce any combination of sounds found in the words of the Target Lists when given a romanized syllable to read. (Although the entire sound system of Chinese is introduced in the module, the student is responsible for producing only sounds used in the Target Sentences for ORN. Producing the remaining sounds is included in the Objectives for Biographic Information.)
3. Know the names and locations of five cities and five provinces of China well enough to point out their locations on a map, and pronounce the names well enough to be understood by a Chinese.
4. Comprehend the numbers 1 through 99 well enough to write them down when dictated, and be able to say them in Chinese when given English equivalents.
5. Understand the Chinese system of using personal names, including the use of titles equivalent to "Mr.," "Mrs.," "Miss," and "Comrade."
6. Be able to ask and understand questions about where someone is from.
7. Be able to ask and understand questions about where someone is.
8. Be able to give the English equivalents for all the Chinese expressions in the Target Lists.
9. Be able to say all the Chinese expressions in the Target Lists when cued with English equivalents.
10. Be able to take part in short Chinese conversations, based on the Target Lists, about how he is, who he is, and where he is from.

Unit 1

Introduction

Topics Covered in this Unit

1. Questions and answers about full names and surnames.
2. Titles and terms of address ("Mr.", etc.).

Prerequisites to the Unit

(Be sure to complete these before starting the unit.)

1. Background Notes
2. P&R 1 (Tape 1 of the resource module on Pronunciation and Romanization), the tones.
3. P&R 2 (Tape 2 of the resource module on Pronunciation and Romanization), the tones.

Materials You Will Need

1. The C-1 and P-1 tapes, the Reference List and Reference Notes.
2. The drill tape (1D-1)

About the C-1 and P-1 Tapes

The C-1 and P-1 tapes are your introduction to the Chinese words and structures presented in each unit. The tapes give you explanations and practice on the new material. By the time you have worked through these two tapes, you will be competent in understanding and producing the expressions introduced in the unit.

With the C-1 tape, you learn to understand the new words and structures. The material is presented in short conversational exchanges, first with English translations and later with pauses which allow you to translate. Try to give a complete English translation for each Chinese expression. Your goal when using the C-1 tape is to learn the meanings of all the words and structures as they are used in the sentences.

With the P-1 tape, you learn to put together these sentences. You learn to pronounce each new word and use each new structure. When the recorded instructions direct you to pronounce a word or say a sentence, do so out loud. It is important for you to hear yourself speaking Chinese, so that you will know whether you are pronouncing the words correctly. Making the effort to say the expression

is a big part of learning it. It is one thing to think about how a sentence should be put together or how it should sound. It is another thing to put it together that way or make it sound that way. Your goal when using the P-1 tape is to produce the Target List expressions in Chinese when given English equivalents. At the end of each P-1 tape is a review of the Target List which you can go over until you have mastered the expressions.

At times, you may feel that the material on a tape is being presented too fast. You may find that there is not enough time allowed for working out the meaning of a sentence or saying a sentence the way you want to. When this happens, stop the tape. If you want to, rewind; Use the control buttons on your machine to make the tape manageable for you most and to get the most out of it.

About the Reference List and the Reference Notes

The Reference List and the Reference Notes are designed to be used before, during, or directly after work with the C-1 and P-1 tapes.

The Reference List is a summary of the C-1 and P-1 tapes. It contains all sentences which introduce new material, showing you both the Chinese sentences written in romanization and their English equivalents. You will find that the list is printed so that either the Chinese or the English can be covered to allow you to test yourself on comprehension, production, or romanization of the sentences.

The Reference Notes give you information about grammar, pronunciation, and cultural usage. Some of these explanations duplicate what you hear on the C-1 and P-1 tapes. Other explanations contain new information.

You may use the Reference List and Reference Notes in various ways. For example, you may follow the Reference Notes as you listen to a tape, glancing at an exchange or stopping to read a comment whenever you want to. Or you may look through the Reference Notes before listening to a tape, and then use the Reference List while you listen, to help you keep track of where you are. Whichever way you decide to use these parts of a unit, remember that they are reference materials. Don't rely on the translations and romanizations as subtitles for the C-1 tape or as cue cards for the P-1 tape, for this would rob you of your chance to develop listening and responding skills.

About the Drills

The drills help you develop fluency, ease of response, and confidence. You can go through the drills on your own, with the drill tapes, and the teacher may take you through them in class as well.

Allow more than half an hour for a half-hour drill tape, since you will usually need to go over all or parts of the tape more than once to get full benefit from it.

The drills include many personal names, providing you with valuable pronunciation practice. However, if you find the names more than you can handle the first time through the tape, replace them with the pronoun **tā** whenever possible. Similar substitutions are often possible with place names.

Some of the drills involve sentences which you may find too long to understand or produce on your first try, and you will need to rewind for another try. Often, particularly the first time through a tape, you will find the pauses too short, and you will need to stop the tape to give yourself more time. The performance you should aim for with these tapes, however, is full comprehension and full, fluent, and accurate production while the tape rolls.

The five basic types of drills are described below.

1. **Substitution Drills:** The teacher (T) gives a pattern sentence which the student (S) repeats. Then the teacher gives a word or phrase (a cue) which the student substitutes appropriately in the original sentence. The teacher follows immediately with a new cue.

Example 1.1. Here is an English example of a substitution drill:

- T: Are you an American?
- S: Are you an American?
- T: (cue) English
- S: Are you English?
- T: (cue) French
- S: Are you French?

2. **Transformation Drills:** On the basis of a model provided at the beginning of the drill, the student makes a certain change in each sentence the teacher says.

Example 1.2. Here is an English example of a transformation drill, in which the student is changing affirmative sentences into negative ones:

- T: I'm going to the bank.
- S: I'm not going to the bank.
- T: I'm going to the store.
- S: I'm not going to the store.

3. Response Drills: On the basis of a model given at the beginning of the drill, the student responds to questions or remarks by the teacher as cued by the teacher.

Example 1.3. Here is an English example of a response drill:

- T: What is his name? (cue) Harris
- S: His name is Harris.
- T: What is her name? (cue) Noss
- S: Her name is Noss.

4. Expansion Drills: The student adds something to a pattern sentence as cued by the teacher.

Example 1.4. Here is an English example of an expansion drill:

- T: He isn't Chinese, (cue) Japanese.
- S: He isn't Chinese. He's Japanese.
- T: She isn't German. (cue) French.
- S: She isn't German. She's French.

5. Combination Drills: On the basis of a model given at the beginning of the drill, the student combines two phrases or sentences given by the teacher into a single utterance.

Example 1.5. Here is an English example of a combination drill:

- T: I am reading a book. John gave me the book.
- S: I am reading a book which John gave me.
- T: Mary bought a picture. I like the picture.
- S: Mary bought a picture which I like.

Reference notes

Notes on № 1-4

1.	A: Nǐ shi shéi?	你是谁？	Who are you?
	B: Wǒ shi Wáng Dànián.	我是王大年。	I'm Wáng Dànián.
2.	A: Nǐ shi shéi?	你是谁？	Who are you?
	B: Wǒ shi Hú Měilíng.	我是胡美玲。	I'm Hú Měilíng.
3.	A: Tā shi shéi?	他是谁？	Who is he?
	B: Tā shi Mǎ Mínglǐ	他是马明理。	He is Mǎ Mínglǐ.
4.	A: Tā shi Mǎ Mínglǐ.	他是马明理。	He is Mǎ Mínglǐ.
	B: Tā shi Hú Měilíng.	她是胡美玲。	She is Hú Měilíng.

The verb **shì** means "to be" in the sense of "to be someone or something," as in "I am Daniel King." It expresses identity. (In Unit 4 you will learn a verb which means "to be" in another sense, "to be somewhere," as in "I am in **Běijīng**." That verb expresses location.) The verb **shí** is in the Neutral tone (with no accent mark) except when emphasized.

Unlike verbs in European languages, Chinese verbs do not distinguish first, second, and third persons. A single form serves for all three persons.

Wǒ	shí	Wáng Dànián.	I am Wáng Dànián.
Nǐ	shí	Hú Měilíng.	You are Hú Měilíng.
Tā	shí	Mǎ Mínglǐ.	He is Mǎ Mínglǐ.

Later you will find that Chinese verbs do not distinguish singular and plural, either, and that they do not distinguish past, present, and future as such. You need to learn only one form for each verb.

The pronoun **tā** is equivalent to both "he" and "she." (and it), but the writing is different: he → **他**, she → **她**, it → **它**.

The question **Nǐ shi shéi?** is actually too direct for most situations, although it is all right from teacher to student or from student to student. (A more polite question is introduced in Unit 2.)

Unlike English, Chinese uses the same word order in questions as in statements.

Tā	shí	shéi?	Who is he?
Tā	shí	Mǎ Mínglǐ?	He is Mǎ Mínglǐ.

When you answer a question containing a question word like **shéi**, "who," simply replace the question word with the information it asks for.

Notes on № 5-6

5. A: Nǐ xìng shénme? 你姓什么? What is your surname?
 B: Wǒ xìng Wáng. 我姓王. My surname is Wáng.

6. A: Tā xìng shénme? 他姓什么? What is his surname?
 B: Tā xìng Mǎ. 他姓马. His surname is Mǎ.

Xìng is a verb, "to be surnamed." It is in the same position in the sentence as shì, "to be."

Wǒ	shi	Wáng Dànián.
I	am	Wáng Dànián.

Wǒ	xìng	Wáng.
I	am surnamed	Wáng.

Notice that the question word shénme. "What," takes the same position as the question word shéi "who."

Nǐ	shi	shéi?
You	are	who?

Nǐ	xìng	shénme?
You	are surnamed	what?

Shénme is the official spelling. However, the word is pronounced as if it were spelled shémma, or even shéma (often with a single rise in pitch extending over both syllables.) Before another word which begins with a consonant sound, it is usually pronounced as if it were spelled shém.

Notes on № 7-8

7. A: Tā shi shéi? 他是谁? Who is he?
B: Tā shi Mǎ xiānsheng. 他是马先生. He is Mr. Mǎ .

8. A: Tā shi shéi? 他是谁? Who is he?
B: Tā shi Mǎ Mínglǐ xiān- sheng. 他是马明理先生. He is Mr. Mǎ Mínglǐ.

After the verb **shì** you may have the full name alone, the surname plus title, or the full name plus title.

Tā	shi	Mǎ	Mínglǐ
Tā	shi	Mǎ	Xiānsheng.
Tā	shi	Mǎ	Xiānsheng.

Xiānsheng, literally "first-born," has more of a connotation of respectfulness than "Mr." **Xiānsheng** is usually applied only to people other than oneself. Do not use the title **Xiānsheng** (or any other respectful title, such as **Jiàoshòu**, "Professor" when giving your own name. If you want to say "I am Mr. Jones," you may say **Wǒ xìng Jones**.

When a name and title name are said together, logically enough it is the name which gets the heavy stress: **WÁNG Xiānsheng**, You will often hear the title pronounced with no full tones: **WÁNG Xiansheng**.

Notes on № 9-12

9. A: Wáng xiānsheng, tā 王先生, 他是谁? Mr. Wáng, who is he?
shì shéi?
B: Tā shì Mǎ Mínglǐ xiān- 他是马明理先生。 He is Mr. Mǎ Mínglǐ.
sheng.

10. A: Xiānsheng, tā shì 先生, 他是谁? Sir, who is he?
shéi?
B: Tā shì Mǎ xiānsheng 他是马先生。 He is Mr. Mǎ.

11. A: Xiānsheng, tā shì 先生, 她是谁? Sir, who is she?
shéi?
B: Tā shì Mǎ tàitai. 她是马太太。 She is Mrs. Mǎ.

12. A: Wáng xiānsheng, tā 王先生, 她是谁? Mr. Wáng, who is she?
shì shéi?
B: Tā shì Mǎ Mínglǐ tài- 她是马明理太太。 She is Mrs. Mǎ Mínglǐ.
tai.

When you address someone directly, use either the name plus the title or the title alone. **Xiānsheng** must be translated as "Sir" when it is used alone, since "Mr." would not capture its respectful tone. (**Tàitai**, however, is less respectful when used alone. You should address Mrs. Mǎ as **Mǎ tàitai**.)

Notes on № 13-16

13. A: Wáng xiānsheng, tā 王先生, 她是谁? Mr. Wáng, who is she?

ne	呢	question marker
xièxie	谢谢	thank you

Reference notes

Notes on № 1-3

1. A: Tā shì Wáng tàitai ma? 她是王太太, 吗? Is she Mrs. Wáng?
 B: Tā shì Wáng tàitai. 她是王太太。 She is Mrs. Wáng.

2. A: Nǐ shì Wáng xiānsheng ma? 你是王先生吗? Are you Mr. Wáng?
 B: Wǒ shì Wáng Dànián. 我是王大年。 I'm Wáng Dànián.

3. A: Nǐ shì Mǎ xiānsheng ma? 你是马先生吗? Are you Mr. Mǎ?
 B: Wǒ shì Wáng Dànián. 我是王大年。 I'm Wáng Dànián.

The marker **ma** may be added to any statement to turn it into a question which may be answered "yes" or "no,"

The reply to a yes/no question is commonly a complete affirmative or negative statement, although, as you will see later, the statement may be stripped down considerably.

Notes on № 4-5

4. A: Nǐ shì Mǎ xiānsheng ma? 你是马先生吗? Are you Mr. Mǎ?
 B: Wǒ bú shì Mǎ xiānsheng. 我不是马先生。 I'm not Mr. Mǎ.

5. A: Wǒ shì Wáng Dànián. 我是王大年。 I am Wáng Dànián.
 B: Wǒ bú shì Wáng Dànián. 我不是王大年。 I am not Wáng Dànián.

The negative of the verb **shì**, "to be," is **bú shì**, "not to be." The equivalent of "not" is the syllable **bù**. The tone for the syllable **bù** depends on the tone of the

following syllable. When followed by a syllable with a High, Rising, or Low tone, a Falling tone is used (bù). When followed by a syllable with a Falling or Neutral tone, a Rising tone is used (bú).

Example 1.6. Examples

bù fēi (not to fly)

bù féi (not to be fat)

bù fěi (not to slander)

bú fèi (not to waste)

Almost all of the first few verbs you learn happen to be in the Falling tone, and so take bù. But remember that bù is the basic form. That is the form the syllable takes when it stands alone as a short "no" answer --bù-- and when it is discussed, as in "bù means 'not'."

Notice that even though shì, "to be," is usually pronounced in the Neutral tone in the phrase bú shì, the original Falling tone of shì still causes bù to "be pronounced with a Rising tone: bú.

Wǒ		shi		Wáng Dànián.
I		am		Wáng Dànián.

Wǒ	bú	shi		Mǎ Xiānsheng.
I		am	not	Mǎ Xiānsheng.

Notes on № 6-8

6. A: Nǐ xìng Fāng ma?	你姓方吗？	Is your surname Fāng?
B: Wǒ bú xìng Fāng	我不姓方。	My surname isn't Fāng.
7. A: Wǒ xìng Wáng.	我姓王。	My surname is Wáng.
B: Wǒ bú shì Wáng.	我不姓王。	My surname isn't Wáng.
8. A: Nǐ xìng Mǎ ma?	你姓马吗？	Is your surname Mǎ?
B: Bù xìng Mǎ. Xìng Wáng.	不姓马。 (我)姓王。	My surname isn't Mǎ. My surname is Wáng.

It is quite common in Chinese --much commoner than in English-- to omit the subject of a sentence when it is clear from the context.

Notes on № 9

9. A: Nín guìxìng?	您贵姓？	Your surname? (polite)
--------------------	------	------------------------

B: Wǒ xìng Wáng. 我姓王。 My surname is Wáng.

Nín is the polite equivalent of nǐ, "you."

Guìxìng is a polite noun, "surname." Guì means "honorable." Xìng which you have learned as the verb "to be surnamed" is in this case a noun, "surname."

Literally, Nín guìxìng? is "Your surname?" The implied question is understood, and the "sentence" consists of the subject alone.

Notes on № 10

10. A: Nǐ jiào shénme? 你叫什么? What is your given name?
B: Wǒ jiào Dànián. 我叫大年。 My given name is Dànián.

Jiào is a verb meaning "to be called." In a discussion of personal names, we can say that it means "to be given-named."

Notes on № 11

11. A: Nǐ hǎo a? 你好阿? How are you?
 B: Wǒ hǎo# 我好 I'm fine.

Notice that the Low tones of **wǒ** and **nǐ** change to Rising tones before the Low tone of **hǎo**: **Nǐ hǎo a?** **hǎo**.

Hǎo is a verb: "to "be good" "to be well" "to be fine." Since it functions like the verb "to be" plus an adjective in English, we will call it an adjectival verb.

Wǒ	hǎo	
I	am fine	

Nǐ	hǎo	a?
You	are fine	?

Notes on № 12

12. A: Nǐ hǎo a? 你好阿? How are you?
 B: Wǒ hǎo. Nǐ ne? 我好, 你呢? I'm fine. And you?
 A: Hǎo, xièxie. 好, 谢谢。 Fine, thanks.

The marker **ne** makes a question out of the single work **nǐ**, "you": "And you?" or "How about you?"

Notes on № 13

One way to ask what someone's given name is: **Nǐ jiào shénme míngzì?**

Reference Notes

Notes on № 1-3

1. A: Nǐ shì Měiguó rén ma? 你是美国人吗？ Are you American?
 B: Wǒ shì Měiguó rén. 我是美国人。 I'm American.

2. A: Nǐ shì Zhōngguó rén ma? 你是中国人吗？ Are you Chinese?
 B: Wǒ shì Zhōngguó rén. 我是中国人。 I'm Chinese.

3. A: Wáng xiānsheng, nǐ shì Yīngguó rén ma? 王先生，你是英国人吗？ Mr. Wáng, are you English?
 B: Wǒ bú shì Yīngguó rén. 我不是英国人。 I'm not English.

Rén is a noun, "person" or "persons"; so Měiguó rén is a noun phrase, literally "American person." Sometimes, however, it is preferable or necessary to translate expressions of this sort as adjectives or prepositional phrases.

Tā shi Měiguó rén .	他是美国人。	He is an American (noun phrase)
Tā shi Zhōngguó rén.	他是中国人。	He is Chinese (adjective)
Tā shi Shāndōng rén.	他是山东人。	He is from Shāndōng. (prepositional phrase)

Although Měiguó rén is translated here as "an American," in other contexts it may be translated as "the American," "American," or "the Americans." Later you will learn the various ways to indicate in Chinese whether a noun is definite or indefinite, singular or plural.

The syllable -guó usually loses its tone in expressions like Měiguó rén. (some speakers drop the tone when the word stands alone: Měiguó.)

Notes on № 4-5

4. A: Nǐ shì Zhōngguó rén ma? 你是中国人吗？ Are you Chinese?
 B: Bú shì. 不是。 No.

A: Nǐ shì Měiguó rén ma? 你是美国人 Are you American?
吗?

B: Shì. 是。 Yes, I'm.

5. A: Mǎ xiǎojiě shì Měiguó rén ma? 马小姐是美国人吗? Is Miss Mǎ an American?

B: Bú shì, tā bú shì Měiguó rén. 不是, 他不是美国人。 No, she is not an American.

A: Tā shì Zhōngguó rén ma? 他是中国人吗? Is she Chinese?

B: Shì, tā shì Zhōngguó rén. 是, 他是中国人。 Yes, she is Chinese.

The short "yes" answer **shì** is really the verb "am" of the longer, more complete answer. The short "no" answer **bú shì** is really the "am not" of the longer answer.

It is possible to reduce a "no" answer to **bù** (note the Falling tone), but polite usage requires that you follow it up with a more complete answer. Both the short answers **shì** and **bú shì** are commonly followed by complete answers.

Notes on № 6-7

6. A: Nǐ shì něiguó rén? 你是哪国人？ What is your nationality?
 B: Wǒ shì Měiguó rén. 我是美国人。 I'm American.

7. A: Tā shì něiguó rén? 他是哪国人？ What is his nationality?
 B: Tā shì Yīngguó rén. 他是英国人。 He is English.

Něi- is the question word "which." It is a bound word —a word which cannot stand alone— not a free word.

něi-	guo	rén
which	country	person

Notice that the syllable **-guó**, "country," in the phrase **něiguó rén** may lose its rising tone.

Notes on № 8-11

8. A: Nǐ shì nǎrde rén? 他是哪儿的人？ Where are you from?
 B: Wǒ shì Shànghǎi rén. 我是上海人。 I'm from **Shànghǎi**.

9. A: Tā shì Fāng Bǎolán de xiānsheng. 他是方宝兰的先生？ He is **Fāng Bǎolán**'s husband.

10. A: Tā shì nǎrde rén? 他是哪儿的人？ Where is he from?
 B: Tā shì Shāndōng rén. 他是山东人。 He's from **Shāndōng**.

11. A: Nǐ shì nǎrde rén? 你是哪儿的人？ Where are you from?
 B: Wǒ shì Jiāzhōu rén. 我是加州人。 I'm Californian.

nǎr is the question word " where." The syllable **de** is the possessive marker; it functions like the English possessive ending **'s**.

nǎr	-de	réν
where	's	person

By reversing the word order, a slightly more idiomatic translation is possible: "a person of where." The closest English equivalent is "a person from where." To clarify the role of -de in this expression, the tape gives the following example of -de functioning like the English possessive ending -'s:

Fāng Bǎolán	-de	xiānsheng
Fāng Bǎolán	's	husband

Notes on № 12

12. A: Nǐ shì Měiguó rén ma? 你是美国人吗？ Are you an American?
 B: Nǐ shì něiguó rén? 你是哪国人？ What's your nationality?
 A: Nǐ shì nǎrde rén? 你是哪儿的人？ Where are you from?

Reference Notes

Notes on № 1

1. A:	Qǐngwèn, nǐ shì nǎrde rén?	请问，你是哪儿的人？	May I ask, where are you from?
B:	Wǒ shì Dézhōu rén.	我是德州人。	I'm from Texas.

Qǐngwèn: Literally, **qǐng** means "request," and **wèn** means "ask (for information)." **Qǐngwèn** is used as English speakers use "excuse me," to get someone's attention in order to ask him a question.

Note

Qǐngwèn is NOT the word used for saying "excuse me" when you step on someone's foot. For that, you say **duìbuqǐ** .

Notes on № 2

2. A:	Qǐngwèn, Āndésen fūren shì nǎrde rén?	请问，安德森夫人是哪儿的人？	May I ask, where is Mrs. Andersen from?
B:	Tā shì Dézhōu rén.	他是德州人。	She is from Texas too.

Names: In the People's Republic, a foreigner is known by the standard phonetic equivalent of his full name. His given name is followed by his surname, which is followed by the appropriate title, Mr. David Anderson will be called **Dàwèi Āndésèn Xiānsheng** . In Taiwan, there is no set way of giving names to foreigners. Sometimes, as in the PRC, a phonetic equivalent of the full name is used (though there are no standard versions). Sometimes, the equivalent is based entirely on the surname. Mr. Anderson, for instance, might be **Ān Désēn Xiānsheng** . The surname may also be translated, as when "King" is translated into **Wáng**. It is also common to base the Chinese surname on the first syllable of the original surname, and the Chinese given name on something else (often the original given name). In Taiwan, **Dàwèi** is a common phonetic equivalent for "David." "Mr. David Anderson," therefore, might be **Ān Dàwèi Xiānsheng** .

Here is a chart of SOME of the Chinese names that might be given to Mr. David Anderson.

Table 1.22. PRC

Dàwèi	Āndésèn	Xiānsheng
-------	---------	-----------

Table 1.23. TAIWAN

Ān	Désēn	Xiānsheng
Ān	Dàwèi	Xiānsheng

Titles: In the PRC, a foreign man is addressed as **Xiānsheng**, and a married woman as either **Fūren** or **Taìtai**, depending on her status. The term **Fūren** is an especially respectful term used to address the wife of a high-ranking official or businessman. **Fūren** is also used this way on Taiwan.

An unmarried foreign woman in the PRG may be addressed as **xiǎojiě** "Miss." Married or unmarried women may be addressed as **Nǚshì** or "Ma'am." **Nǚshì** will be introduced in BIO, Unit 1.

The term **Tóngzhì**, "Comrade," was originally used only by members of the Communist Party to address other members. It is now the general term of address used by all Chinese adults in the PRC. It should be remembered, though, that **Tóngzhì** does carry a distinct political implication. Visitors in the People's Republic, who are not citizens and who do not take part in efforts to realize Communist ideals, will not be addressed as **Tóngzhì** and should not feel obliged to address anyone else as such.

Yě is an adverb meaning "also," or "too." It always comes before the verb.

Notes on № 3

3. A: **Tā shì Yīngguó rén ma?** 他是英国人吗？ Is she English?

B: **Bú shì, tā bù shì Yīngguó rén.** 不是，他不是英国人。 No, he is not English.

A: **Tā àiren ne?** 他爱人呢？ And his wife?

B: **Tā yě bù shì Yīngguó rén.** 他也不是英国人。 She isn't English either.

Àiren, which originally meant "loved one," "sweetheart" or "lover," is used in the PRC for either "husband" or "wife," i.e., for "spouse."

The possessive phrase **Tā Àiren**, "his wife" (or, "her husband"), is formed by putting the words for "he" (or "she") and "spouse" together.

The marker **-de** (which you have seen in **nǎrde rén**) is not needed when the possessive relationship is felt to be very close. (See also the notes on No. 5.)

Yě in a negative sentence is usually translated as "either." In this case, **bù** comes between **yě** and the verb. Possible English translations for **yě**, in both affirmative and negative sentences, are:

Tā yě shi Yīngguó rén.	她也是英国人。	She is English too. She is also English.
Tā yě bù shi Yīngguó rén.	她也不是英国人。	She is not English either. She is also not English.

Notes on № 4

4. A: **Qǐngwèn, Qīngdǎo zài nǎr?** 请问，青岛在哪儿？ May I ask, where is **Qīngdǎo**?

B: Qīngdǎo zài Shāndōng. 青岛在山东。 Qīngdǎo is in Shāndōng.

Zài is the verb "to be in/at/on," that is, "to be somewhere." Zài involves location, while shì involves identity, "to be someone/something."

Notes on № 5

5. A: Qǐngwèn, nǐ lǎojiā zài nǎr? 请问, 你老家在哪儿? May I ask, where is your family from?

B: Wǒ lǎojiā zài Āndàlùè. 我老家在安大略。 My family is from Ontario.

B: Wǒ lǎojiā zài Shāndōng. 我老家在山东。 My family is from Shāndōng.

Literally, lǎojiā is "old home" ("original home," "ancestral home," "native place"), that is, the place you and your family are from. When a Chinese asks you about your lǎojiā, he probably wants to know about your hometown, the place where you grew up.

When you ask a Chinese about his lǎojiā however, he will tell you where his family came from originally. A Chinese whose grandparents came from the province of Guǎngdōng will give that as his lǎojiā, even if he and his parents have spent all of their lives in Sīchuān.

Nǐ lǎojiā zài nǎr? (literally "Where is your original home?") asks for the LOCATION of the town you come from.

The question is answered with zài plus the name of the province (or state) that the town is located in: Wǒ lǎojiā zài Dèzhōu (Āndàlùè, Shāndōng). Nǐ lǎojiā shì nǎr? (translated into English as "What is your original home?" asks about the IDENTITY of the town you come from. That question is answered with shì plus the name of the town (or city): Wǒ lǎojiā shì Jiūjīnshān (Qīngdǎo, Shànghǎi).

Compare:

Wǒ lǎojiā zài Guǎngdōng.	我老家在廣東。	My original home is in Guǎngdōng.
Wǒ lǎojiā shì Guǎngzhōu.	我老家是广州。	My original home is Guǎngzhōu.

The possessive nǐ lǎojiā, like tā àiren, does not require a possessive marker. However, if more than one word must be used to indicate the possessor, -de is often inserted after the last word: nǐ àirende lǎojiā, "your spouse's original home" or "where your spouse's family comes from."

Notes on № 6-8

6. A: Chén Shìmín tóngzhì zài nǎr? 陈世民同志在哪儿? Where is comrade Shìmín?

B: Tā zài nàr. 他在那儿。 He's there.

7.	A: Qīngdǎo zài nǎr?	青岛在哪儿?	Where is Qīngdǎo?
	B: Zài zhèr.	在这儿。	It's here.
8.	A: Nǐ àiren xiànzài zài nǎr?	你爱人现在在哪儿?	Where is your wife now?
	B: Wǒ àiren xiànzài zài Jiānádà.	我爱人现在在加拿大。	My wife is in Canada now.

You have learned three words for asking and telling about locations.

nǎr	哪儿	where
nàr (nèr)	那儿	there
zhèr	这儿	here

Notice that the question word **nǎr** is in the Low tone, while the answer words **nàr** and **zhèr** are both in the Falling tone. Also notice that the vowel sound in **zhèr** is different from that in **nǎr** and **nàr**. (Some speakers prefer **nèr** to **nàr**.) When you are talking about movable things and people that you presume are not nearby ("nearby," being approximately within pointing range), you usually ask where they are NOW. The "present time" word may be omitted if the time has been established earlier in the conversation.

Nǐ àiren xiànzài zài nǎr?	你爱人现在在哪儿?	Where is your wife now?
Tā zài Běijīng.	她在北京。	She's in Běijīng (now).

If you ask about someone or something you presume to "be nearby (a pair of scissors in a drawer, for instance, or a person in a group across the room), you do not use **xiànzài**.

In English, the words "here" and "there" are used to refer to locations of any size. In Chinese, however, **zhèr** and **nàr** are usually not used for cities, provinces, and countries (with the exception that you may use **zhèr** to refer to the city you are in). Instead, you repeat the name of the place.

Compare these two exchanges in **Běijīng**:

Country:	Mǎdǐng Xiānsheng xiànzài zài Zhōngguó ma? Tā xiànzài zài Zhōngguó. He is here now.
City:	Mǎdǐng Xiānsheng xiànzài zài Shànghǎi ma? Tā bù zài Shànghǎi; tā zài zhèr. He is not there; he is here.

Jiānádà "Canada": Although the middle syllable of this word is marked with the Rising tone, at a normal rate of speech you will probably hear **Jiānādà**.

Criterion Test

The purpose of the Criterion Test at the end of each module is to show you not only how much of the material you have learned, but also what points you need to work on before beginning to study another module.

Since the primary goal of ORN is to introduce the sound system of Standard Chinese, this test focuses on your ability to discriminate and produce tones, vowels, and consonants. Additionally, there are sections which test your ability to comprehend and produce numbers from 1 through 99 and the material in the ORN Target Lists.

Your knowledge of personal names and titles and the romanization system is also tested. Read the Objectives at the beginning of the module for a description of exactly what the test covers.

Note: Although the entire sound system is introduced in the Pronunciation and Romanization Module, you will be tested here only on those sounds which occur in the Target Sentences. Other sounds will be included in Criterion Tests for later modules.

Following is a sample of the Criterion Test for this module. Each section of the test, with directions and a sample question, is represented here so that you may know exactly what is expected of you after studying the ORN Module.

Minimum scores are suggested for each section of the test. Achieving these scores means that you are adequately prepared for the next module. If you fall below the minimum criterion on any section, you should review relevant study materials.

You will use a tape to complete Part I of the test. Part II is written, and you will complete Part III with your instructor. Part IV of the test (Diagnostics) indicates the passing score for each section and review materials for each section.

Part I

1. This section tests your ability to distinguish the four tones. In your test booklet you will see two syllables after each letter. The speaker will pronounce both syllables, and then say one of them again. You are to decide which syllable was repeated, and circle the appropriate one to indicate your choice. The syllables may occur in any of the four tones, regardless of which tone was used previously in the module. The same syllable may occur more than once in this section.

For example, the speaker might say: **fēi** ... **fěi** and then repeat **fēi**

- a. **fēi fěi**

2. This section tests your ability to recognize the four tones in isolated syllables. The speaker will pronounce a syllable twice; you add to the written syllable the tone that you hear. Again, the syllables may occur in any of the four tones, regardless of which tone was used previously in the module.

For example, the speaker might say: **fěi...fěi**

a. **fei** → **fěi**

3. This section tests your ability to recognize the four tones in two-syllables combinations. The speaker pronounces each two-syllable item twice and then pauses a moment for you to mark tones on the written syllables. For the first ten items, one of the two tones is already marked. For the last ten items, you must fill in both tones.

For example: the speaker might say: **cháběi...cháběi**

a. **chabei** → **cháběi**

4. In this section, you are tested on syllables which differ minimally in sound. The speaker will pronounce each syllable in an item once; then he will pronounce one of the syllables again. Decide which of the syllables was repeated, and indicate your choice by circling that written syllable in your test booklet. The syllables in this test do not necessarily correspond in every way to syllables in the Target Lists. They may vary in tone, for example.

For example, the speaker might say: **fān...fàng** and then repeat **fàng**.

a. **fān fàng**

5. In this section, you complete the romanization for the syllables that you hear. As the speaker says a syllable, write the appropriate vowel or consonant letter(s) in the blank. This tests your ability to recognize the sounds of a syllable and to use the romanization system correctly. The speaker will say each syllable twice.

For example, the speaker might say: **pàng...pàng** then you would write:

a. **pàng**

6. This section tests your ability to understand the numbers 1 through 99 in Chinese. For each item, the speaker will say a number, and you write down the numerals for that number.

For example, you might hear: **shí-sān**

a. 13

7. This section tests your ability to understand questions and answers about where someone is from and where he is now. Listen to a conversation between Mr. Johnson and Comrade **Zhào**, who have just met. You will hear the conversation three times. The third time you hear it, a pause will follow each line. You may use these pauses to fill in the boxes in your booklet with appropriate information. (You do not have to wait for the second repetition of the conversation to fill in the answers, of course.)

For example: [You will hear a conversation similar to conversations you heard on the C-2 tapes in this module.]

	Home Province	State	or	Present Location
Comrade Zhào				
Mr. Johnson (Yuēhànsūn)				
Comrade Zhào 's husband				
Mrs. Johnson				

8. This section tests your ability to comprehend Chinese utterances by asking you for the English equivalents. For each item, the speaker will say a sentence from the Target List twice. You indicate your understanding of the sentence by circling the letter of the English sentence which most closely matches the meaning of the Chinese sentence.

For example, you might hear: **nǐ shì shéi?...nǐ shì shéi?**

- a. Who is she?
- b. Who is he?
- c. Who are you?

Part II

1. This section tests your general understanding of the Chinese system of personal names and titles. Read the family histories in your test booklet, and answer the questions.

For example,

Yáng Tíngfēng is the Chinese name used by an American, Timothy Young, now that he is living in Taipei. His Chinese surname is:

- a. **Yáng**
- b. **Tíngfēng**
- c. **Yáng Tíngfēng**

Part III

1. This section tests your ability to pronounce the four tones. Simple sound combinations have been chosen so that special attention may be given to tone production. For each item, choose one syllable and read it aloud. As you do so, put a circle around the one you choose. The instructor will note the syllable he hears. Be sure to choose a fair sampling of all four tones, and select them in random order.

For example, you might say:

- a. **mā má mǎ mà**

2. This section tests your ability to pronounce Chinese sounds from the Target Lists, as well as your ability to read romanization. For each item, choose one syllable and read it aloud. As you do so, put a circle around the one you choose. The instructor will note the syllable he hears. Be sure to choose syllables from each column as you go through this section of the test.

For example, you might say:

- a. **nín...níng**

3. This section tests your ability to locate and name main cities and provinces in China. Using the map in your booklet, point out to your instructor five cities and five provinces and name them. Pronunciation is of secondary importance here.

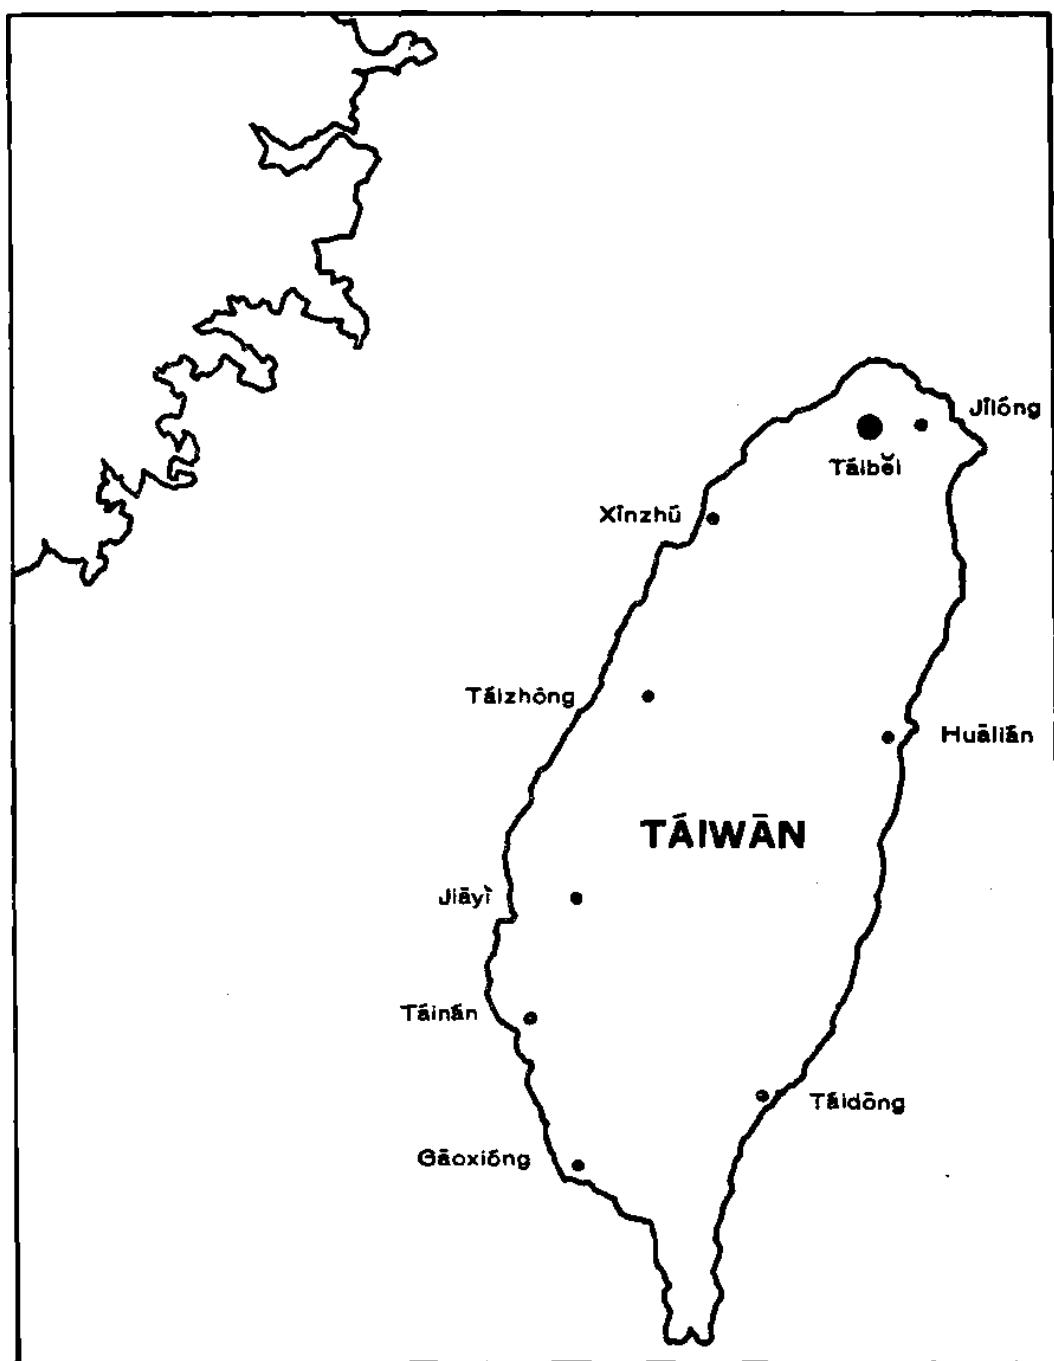

4. This section tests your ability to produce sentences in Chinese. Your instructor will say an English sentence from the Target Lists, and you translate it into Chinese. Your Chinese sentence must "be correct," both in grammar and in content.
5. This section tests your ability to make conversational use of the material covered in this module. Although limited in scope, this conversation between you and your instructor represents a situation which you are likely to encounter in the real world. As in any conversation, you are free to ask for a repetition or rephrasing of a sentence, or you may volunteer information on the subject. It is not so much the correctness of your pronunciation and grammar that is being tested as it is your ability to communicate effectively.

Module 2: Biographic Information

The Biographic Information Module provides you with linguistic and cultural skills needed for a simple conversation typical of a first-meeting situation in China. These skills include those needed at the beginning of a conversation (greetings, introductions, and forms of address), in the middle of a conversation (understanding and answering questions about yourself and your immediate family), and at the end of a conversation (leave-taking).

Before starting this module, you must take and pass the ORN Criterion Test. The resource modules Pronunciation and Romanization and Numbers (tapes 1-4) are also prerequisites to the BIO Module.

The Criterion Test will focus largely on this module, but material from Module 1 and associated resource modules may also be included.

Objectives

Upon successful completion of the module, the student should be able to:

1. Pronounce correctly any word from the Target Lists of ORN or BIO, properly distinguishing sounds and tones, using the proper stress and neutral tones, and making the necessary tone changes.
2. Pronounce correctly any sentence from the BIO Target Lists, with proper pauses and intonation, that is, without obscuring the tones with English intonation.
3. Use polite formulas in asking and answering questions about identity (name), health, age, and other basic information.
4. Reply to questions with the Chinese equivalents of "yes" and "no"
5. Ask and answer questions about families, including who the members are, how old they are, and where they are.
6. Ask and answer questions about a stay in China, including the date of arrival, location-purpose-duration of stay, previous visits, traveling companions, and date of departure.
7. Ask and answer questions about work or study, identification of occupation, the location, and the duration.
8. Give the English equivalent for any Chinese sentence in the BIO Target Lists.
9. Be able to say any Chinese sentence in the BIO Target Lists when cued with its English equivalent.
10. Take part in a short Chinese conversation, using expressions included in the BIO Target List sentences.

Reference Notes

Notes on № 1

1. A: Qǐngwèn, nǐ zhù zai nǎr? 亲吻, 你朱在哪儿?
B: Wǒ zhù zai Běijīng Fàndiàn. 握住在北京饭店。

May I ask, where are you staying?
I'm staying at the Beijing Hotel.

The verb **zhù**, "to live," or "to reside," may be used to mean "to stay at" (temporary residence) or "to live in" (permanent residence).

Zhù zài nǎr literally means "live at where." The verb **zài**, "to be in/at/on," is used here as a preposition "at." It loses its tone in this position in a sentence. (The use of **zài** as a preposition is treated more fully in Unit 2.)

Fàndiàn has two meanings "restaurant" and "Hotel" (a relatively large hotel with modern facilities).¹ Literally, **fànguǎnzi** means "rice shop."

Notes on № 2

2. A: Nǐ zhù zai Mínzú Fàndiàn ma? 你住在民族饭店吗?
B: Shì, wǒ zhù zai Mínzú Fàndiàn. 是, 我住在民族饭店吗。

Are you staying at the Nationalities Hotel?
Yes, I'm staying at the Nationalities Hotel.

Shì: The usual way to give a short affirmative answer is to repeat the verb used in the question. Some verbs, however, may not be repeated as short answers. **Zhù** is one such verb. Others not to be used are **xìng**, "to be surnamed," and **jiào**, "to be given-named." Many speakers do not repeat the verb **zài** as a short answer. To give a short "yes" answer to questions containing these verbs, you use **shì**.

Notes on № 3-7

3. A: Nǐ zhù zai něige fàndiàn? 你住在哪个饭店?
B: Wǒ zhù zai Běijīng Fàndiàn. 我住在北京饭店。

Which hotel are you staying at?
I'm staying at the Beijing Hotel.

4. A: Něiwèi shì Zhāng 哪位是张同志?
B: Nǐ zhù zai Běijīng Fàndiàn. 我住在北京饭店。

Which one is comrade Zhāng?

¹Another word for "restaurant" is **fànguǎnzi**. The general word for "hotel" is **lǚguǎn**.

B: Tā shì Zhāng tóngzhì. 他是张同志。 She is comrade **Zhāng**.

5. A: Něige rén shì Méi 哪个人是Méi 同志? Which person is comrade **Méi**?

B: Nèige rén shì Méi 那个人是Méi 同志。 That person is comrade **Méi**.

6. A: Něiwei shì Gāo tóngzhì? 哪位是局同志? Which one is comrade **Gāo**?

B: Nèiwèi shì Gāo tóngzhì. 那位是局同志。 That one is comrade **Gāo**.

7. A: Nǐ zhù zai zheige fàndiàn 你住在这个饭店吗? Are you staying at this hotel?

B: Bù, wǒ bú zhù zai zheige 不, 我不住在这个饭店。 No, I'm not staying at this hotel.

Něige is the question word "which." In the compound **něiguó**, you found the bound word **něi-**, which was attached to the noun **guó**. In the phrase **něiguó rén**, "which person," the bound word **něi-** is attached to the general counter **-ge**. (You will learn more about counters in Unit 3. For now, you may think of **-ge** as an ending which turns the bound word **něi-** into the full word **něige**.)

Něige rén/něiwèi: To be polite when referring to an adult, you say **něiwèi** or **nèiwèi**, using the polite counter for people **-wèi** rather than the general counter **-ge**, though **-ge** is used in many informal situations.

Notice that the noun **rén** is not used directly after **-wèi**:

Něiwèi	Měiguó rén	shì shéi?
Něiwèi		zhù zài Mínzú Fàndiàn.

Compare the specifying words "which?" "that," and "this" with the location words you learned in Unit U of ORN:

Specifying words		Location words	
něige? (nǎge?)	which	nǎr	where
něige (nàge)	that	nàr (nèr)	there
zhèige (zhège)	this	zhèr (zhàr)	here

Both question words are in the Low tone, while the other four words are in the Falling tone.

Many people pronounce the words for "which?" "that," and "this" with the usual vowels for "where?" "there," and "here": **nǎge?** **nàge**, and **zhège**.

Bù: A short negative answer is usually formed by **bù** plus a repetition of the verb used in the question. When a verb, like **zhù** (zài), cannot be repeated, **bù** is used

as a short answer and is followed by a complete answer. Notice that when used by itself **bù** is in the Falling ton, but when followed by a Falling-tone syllable **bù** is in the Rising tone.

Bù, tā xiānzài bù zài zhèr. No, he's not here now.

Notes on № 8

8. A: **Jiāng tóngzhì! nín zǎo.** 蒋同志！您早。 Comrade Jiang! Good morning.

B: **Zǎo. Nuòwākè Nǚshì! nín hǎo.** 早。 Nuòwākè 女士！您好。 Good morning, Miss Novak! How are you?

Name as greeting: A greeting may consist simply of a person's name: **Wáng tóngzhì!** "Comrade **Wáng**!" The name may also be used with a greeting phrase: **Wáng tóngzhì! Nín zǎo.** "Comrade **Wáng**! Good morning." --or, in reverse order, **Nín zǎo. Wáng tóngzhì!** "Good morning. Comrade **Wáng**!" The name is pronounced as an independent exclamation acknowledging that person's presence and status. It is not de-emphasized like "Comrade **Wáng**," in the English sentence 11 Good morning, Comrade **Wáng**."

Nín zǎo means "good morning" --literally, "you are early." You may also say either **nǐ zǎo** or simply **zǎo**.

Nǚshì, "Ms.," is a formal, respectful title for a married or unmarried woman. It is used after a woman's own surname, not her husband's. Traditionally, this title was used for older, educated, and accomplished women.

In the PRC, where people use **tóngzhì**, "Comrade," in general only foreign women are referred to and addressed as (so-and-so) **nǚshì**. On Taiwan, however, any woman may be called (so-and-so) **nǚshì** in a formal context, such as a speech or an invitation.

Nín hǎo: This greeting may be said either with or without a question marker, just as in English we say "How are you?" as a question or "How are you?" as a simple greeting.

Nǐ hǎo ma? How are you?

Nǐ hǎo. How are you.

Also Just as in English, you may respond to the greeting by repeating it rather than giving an answer.

Lǐ tóngzhì! Nín hǎo. Comrade **Lǐ!** How are you.

Nín hǎo. Gāo tóngzhì! How are you. Comrade **Gāo!**

Literally, **hěn** means "very." The word often accompanies adjectival verbs (like **hǎo**, "to be good"), adding little to their meaning. (See also Module 3, Unit 3.)

How to identify yourself: You have now learned several ways to introduce yourself. One simple, direct way is to extend your hand and state your name in Chinese -- for instance, **Mǎ Mínglǐ**. Here are some other ways:

Wǒ shì Mǎ Mínglǐ.	I'm Mǎ Mínglǐ.
--------------------------	-----------------------

Wǒ xìng Mǎ.	My surname is Mǎ.
Wǒ xìng Mǎ, jiào Mǎ Mínglǐ.	My surname is Mǎ; I'm called Mǎ Mínglǐ.
Wǒde Zhōngguó míngzì jiào Mǎ Mínglǐ.	My Chinese name is Mǎ Mínglǐ.

Notes on № 9

9. A: Qǐngwèn, nǐ shì Měiguó 请问, 你是
nǎrde rén? 美国哪儿
人?
B: Wǒ shì Jiāzhōu Jiùjīnshān 我是加州旧
rén. 金山人。
May I ask, where are you
from in America?
I'm from San Francisco,
California.

Order of place names: Notice that **Jiāzhōu Jiùjīnshān** is literally "California, San Francisco." In Chinese, the larger unit comes before the smaller. Similarly, in the question **Nǐ shì Měiguó nǎrde rén?** the name of the country comes before the question word **nǎr**, which is asking for a more detailed location. The larger unit is usually repeated in the answer:

Nǐ shì	Shāndōng	nǎr	-de	rén?
Wǒ shì	Shāndōng	Qīngdǎo		rén.

Literally, **Jiùjīnshān** means "Old Gold Mountain." The Chinese gave this name to San Francisco during the Gold Rush days.

Where are you staying?
I'm staying at the Ambassador Hotel.
Where are you staying?
I'm staying here.
How about him?
He is staying there.

The word **guóbīn** actually refers to any official state guest, not just an ambassador. (The word for "ambassador" is **dàshǐ**) The translation "Ambassador Hotel" has been used for years by that hotel and, although inaccurate, has been retained in this text.

Dàfāndiàn means "great hotel" or "grand hotel." It is commonly used in the names of Taiwan and Hong Kong hotels.

Náli, **nàli**, and **zhèli** are common variants of **nǎr**, **nàr**, and **zhèr** in non-Peking dialects of Standard Chinese. The forms with r are Peking dialect forms.

Compare:

Peking	Other	
nǎr	náli	where
nàr	nàli	there
zhèr	zhèli	here

Notice the difference in tone "between **nǎr** and **náli**. This is because **-li** has a basic Low tone, and the first of two adjoining Low-tone syllables changes to a Rising tone: **nǎ** + **-lǐ** = **náli**.

Notes on №3-4

3. A: Nǐ zhù zài náli? 你住在哪
里?
B: Wǒ zhù zài péngyou jiā. 我住在朋友
家。

Where are you staying?
I'm staying at a friend's
home.

4. A: Nǐ péngyou jiā zài nǎlǐ? 你朋友家在
哪理?
B: Tā jiā zài Dàlǐ Jiē. 他家在大力
街。

Where is your friend's house?
His house is on Dàlǐ Street.

The possessive relationships in **péngyou jiā**, "friend's house," **nǐ péngyou jiā**, "your friend's house," and **tā jiā**, "his house," are unmarked, while the English must include -'s or the possessive form of the pronoun ("your," "his"). In Chinese, possessive relationships may be expressed by simply putting the possessor in front of the possessed when the relationship between the two is particularly close, like the relationship between a person and his home, family, or friends.

Notes on №5

5. A: Nǐ péngyoude dìzhǐ shì ...? 你朋友的地
质
是。。。?
B: Tā de dìzhǐ shì jiē 他的地质是
Sìshíèrhào. 大力街四十
二号。

What is your friend's address?
His address is № 42 Dàlǐ street.

Péngyoude dìzhǐ: "The marker **-de** in this phrase is just like the English possessive ending -'s. With the exception of close relationships, this is the usual way to form the possessive in Chinese."

nǐ péngyǒu	-de	dìzhǐ
your friend	's	address

Unlike the English -'s ending, **-de** is also added to pronouns.

wǒde	my
nǐde	your
tāde	his/her

You are learning possessive phrases in which the marker **-de** is used (**tāde dìzhǐ**) and some possessive phrases which do not contain **-de** (**nǐ péngyou jiā**). There are certain reasons for the inclusion or omission of **-de**. If a close relationship exists between the possessor and the possessed, the marker **-de** might not be used. If a phrase is long and complex, as **Lǐ Xiānsheng péngyoude tàitai**, the marker **-de** is used to separate the possessor from the possessed.

short or simple		long or complex	
nǐ	jiā	Hú Měilíng	-de lǎojiā
wǒ	péngyou	nǐ péngyou	-de dìzhǐ
		Lǐ Xiānsheng péngyou	-de tàitai

But these are not hard and fast rules. The use or omission of **-de** is not determined solely by the number of syllables in a phrase or by the closeness between the possessor and the possessed, although both of these considerations do play a role in the decision.

While some common nouns are usually used without **-de** "before them, most nouns are more likely to be preceded by **-de**, and many even require it. **Dìzhǐ**, "address," is the only noun you have learned which REQUIRES the possessive marker **-de** added to the possessor. But other nouns such as **jiā** are not always preceded by **-de**. This is also the case with nouns indicating personal relationships, like **fùmǔ**, "father," and **tàitai** "wife." **Péngyou**, "friend," **xuéshēng**, "student" and **lǎoshī** "student" are commonly used without **-de**, but may also be used with the marker.

You might expect the question **Nǐ péngyoude dìzhǐ...?** to "be completed with a word such as **shénme?**, what. However, the incomplete form given in this exchange, with the voice trailing off, inviting completion, is also commonly used.

Addresses: The order in which addresses are given in Chinese is the reverse of that used in English. In Chinese, the order is from the general to the specific: country, province or state, city, street name, street number.

-hào: A street number is always given with the bound word **-hào**, "number," after it.²

Notes on №6-7

6. A: Nǐ shì Wèi Shàoxiào ba?	你是Wèi少校吧？	You are Major Weiss, aren't you?
B: Shìde.	是的。	Yes.
7. A: Nà shì Guóbīn Dàfàndiàn ba?	那是国宾大酒店吧？	That is Ambassador Hotel, isn't it?
B: Shìde.	是的。	Yes.

Ba is a marker for a question which expresses the speaker's supposition as to what the answer will be. It is the type of question which asks for a confirmation from the listener.

There are three ways to translate the two questions in exchanges 6 and 7 into English:

Nǐ shi Wèi Shàoxiào ba?	Aren't you Major Weiss? You are Major Weiss, aren't you? You must be Major Weiss.
Nǐ shi Guóbīn Dàfàndiàn ba?	Isn't that the Ambassador Hotel? That is the Ambassador Hotel, isn't it? That must be the Ambassador Hotel.

Each translation reflects a different degree of certainty on the part of the speaker. (While the differences in certainty are expressed in English by variation in wording, they can be expressed in Chinese by intonation.) You will probably find that the "isn't it", "aren't you" translation fits most situations.

²The word **dì-** is sometimes translated "number," as in **dìyī**, "number one" (See resource module on Numbers, tape 4.)

The short answer **shìde** is an expanded form of the short answer **shì**, with the same meaning: "Yes, that's so." **Shìde** is also the word used for the "yes" in the military "Yes, sir."

Nà(nèi): In the subject position, **nà (nèi)**, "that," and **zhè (zhèi)**, "this," may be used either as free words or as bound words, with **-ge** following.

Compare:

Nà		shì Guóbīn Dàfàndiàn.
That		is the Ambassador Hotel.
Nà	-ge	shì Guóbīn Dàfàndiàn.
That	one	is the Ambassador Hotel.

However, the question form **nǎ- (něi-)** is a bound word.

Nǎge (fàndiàn) shì Guóbīn Dàfàndiàn? Which one is the Ambassador Hotel?

Notes on №8-11

8. A: Nǐ péngyou xiànzài zài 你朋友现在
náli gōngzuò? 在哪里工
作?
B: Tā zài Táinán gōngzuò. 他在台南工
作。 He works in Táinán.

9. A: Nǐ zài náli gōngzuò? 你在哪里工
作?
B: Wǒ zài Wǔguānchù gōngzuò. 我在武官处
工作。 I work at the Defense At-
tache's Office.

10. A: Nǐ zài náli gōngzuò? 你在哪里工
作?
B: Wǒ zài yínháng gōngzuò. 我在银行工
作。 I work at a bank.

11. A: Nǐ péngyou zài Táiběi gōngzuò ma? 你朋友在台
北工作吗?
B: Tā bú zài Táiběi gōngzuò. 他不在台北
工作。 Tā zài Táizhōng gōngzuò. 他在
台中工作。 Does your friend work in
Taipei?
He doesn't work in Taipei;
he works in Taichung.

Wǔguānchù, "defense attache's office," literally means "military attache's office."

Zài gōngzuò: Compare these two sentences:

Tā	zài	Táinán.	
He	is in	Tainan.	
Tā	zài	Táinán	gōngzuò.
He	in	Tainan	works.

The sentence **Tā zài Táinán gōngzuò** seems to have two verbs: **zài**, "to be in/at/on," and **gōngzuò**, "to work." But there is only one verb in the translation: "He works in Tainan." The translation reflects the fact that **zài** loses its full verb status in this sentence and plays a role like that of the English preposition "in." The **zài** phrase in Chinese, like the "in" phrase in English, gives more information about the main verb **gōngzuò**; that is, it tells where the action takes place. "He works," and the work takes place "in Tainan." In sentences like this, the word **zài** is a prepositional verb. Most relationships expressed by prepositions in English are expressed by prepositional verbs in Chinese.

You have also seen **zài** used as a prepositional verb in the sentence **nǐ zhù zài náli?** "Where do you live?" --literally, "You live at where?" Notice that in this sentence the prepositional verb phrase **zài náli** comes after the main verb **zhù**. In the sentence **Nǐ zài náli gōngzuò?** the prepositional verb phrase **zài náli** comes before the main verb **gōngzuò**. Many things, such as stress, contrast, and other objects in the sentence, can influence the order of the prepositional verb phrase and the main verb.

In some cases, either order may be used, as in **Nǐ zài náli zhù?** or **Nǐ zhù zài náli?**. In other cases, the word order is fixed, as in **Nǐ zài náli gōngzuò?** For text examples, it will be pointed out whether or not the word order may be changed, and the reasons will be given.

Tā bù zài Táiběi gōngzuò, "He doesn't work in Taipei": In this sentence, the negative adverb **bù** comes before the prepositional verb **zài** (which starts the complete predicate **zài Táiběi gōngzuò**, not before the main verb **gōngzuò**). This makes sense, for you are not saying "He does NOT WORK," but you are saying "He does NOT work IN TAIPEI."

Tā			gōngzuò.
Tā	bù		gōngzuò.
Tā		zài Táiběi	gōngzuò.
Tā	bù	zài Táiběi	gōngzuò.

Reference Notes

Notes on №1

1. A: Nǐmen yǒu háizi ma? 你们有孩子吗? Do you have children?
 B: Yǒu, wǒmen yǒu. 有, 我们有。 Yes, we have.

The plural pronouns are formed by adding -men to the singular pronouns

singular		plural	
wǒ	I	wǒmen	we
nǐ	you	nǐmen	you
tā	he/she	tāmen	they

(You have already seen these pronoun forms used as possessives: "my," "our," etc. Later you will find that they are also used as objects: "me," "us," etc.)

Háizi: Chinese nouns have the same form for singular and plural.

Háizi may be either "child" or "children."³ Usually the context will make clear whether a noun should be translated as singular or as plural, but not always. Chinese does not require that the matter be pinned down to the same extent that English does.

Wǒmen yǒu háizi is a perfectly good sentence, even though the only accurate translation is the clumsy "We have one or more children." We would prefer to have enough information to translate it either as "We have a child" or as "We have children."

At times this ambiguity is an advantage. When you ask **Nǐmen yǒu háizi ma?** you do not, after all, know whether you are referring to one child or to more than one child. To cover both bets in the same way in English, we have to say "Do you have any children?"

Notes on №2

2. B: Liú xiānsheng yǒu 刘先生有美
Měiguó péngyou ma? 国朋友吗? Does Mr. Liú have any
American friends?
 B: Tā meiyǒu Měiguó péngyou. 他没有美国
朋友。 He doesn't have any
American friends.
 A: Tā yǒu Yīngguó péngyou. 他有英国朋
友。 He has English friends.
(or an English friend)

Méiyou: All the verbs discussed so far form the negative with **bù**, with the single exception of **yǒu**, "to have," which has the irregular negative form **méiyou**.

³A few nouns referring to people may be made explicitly plural by adding -men. **Háizimen** can only be "children"

Notes on №3-4

3. A: Nǐmen yǒu jǐge háizi? 你们有几个孩子? How many children do you have?
 B: Wǒmen yǒu sānge háizi. 我们有三个孩子。We have three children.

4. A: Nǐmen yǒu jǐge nánháizi, jǐge nǚháizi? 你们有几个男孩子, 几个女孩子? How many boys and how many girls do you have?
 B: Wǒmen yǒu liǎngge nánháizi, yīge nǚháizi. 我们有两个男孩子, 一个女孩子。We have two boys and one girl.

In Peking speech, *jǐ-*, "how many," is usually used only when the number expected in an answer is about 10 or less. In many other parts of China, speakers use *jl-* no matter how large a number is expected in the answer.

Counters: In Chinese, a noun cannot be counted or specified (i.e., used with *něi-* "which," *nèi-*, "that," *zhèi-*, "this") without the addition of a bound word, a counter, to indicate the sort of thing being specified or counted. English has a few such counters, as "head" in "how many head of cattle" and "loaves" in "seven loaves of bread."

The counter used in a particular instance depends on the noun "being specified or counted. Many nouns have special counters. You have already learned the polite counter for persons, *-wèi*. Other special counters refer in some way to the kind of thing the noun represents. The word for "hotel," for instance, has a special counter *-jiā*, "house," used for counting or specifying business establishments.

The general counter *-ge* is used with nouns that do not have special counters. For example, there is no special counter for the word *pùbù*, "waterfall," so you would say *yíge pùbù*, "one waterfall." You have already found the general counter *-ge* in specifying expressions such as *něige háizi*, "which child," and *zhèige fàndiàn*, "this hotel."

You may find that, in colloquial speech, nouns that have special counters are sometimes used with *-ge* anyway, but this tendency is looked down upon by many speakers.

Here are the numbers 1 through 10 with the counter *-ge*:

yíge liǎngge sānge sìge wǔge liùge qíge báge jiǔge shíge

The number 2 has a special form before a counter: *liǎng-*. Notice that the words for 1, 2, and 8 have Rising tones before *-ge*, because *-ge* is basically a Falling-tone syllable. (See also Unit 5, notes on No. 9 and No. 10.)

Nán- nǚ-: The "bound words *nán-* "male," and *nǚ-*, "female," are often used in compounds; for example, *nánpéngyou*, "boyfriend," and *nǚtóngzhì* "(woman) Comrade."

"And": In Chinese, a word for "and" is not needed between parallel phrases like **liǎngge nánháizi, yíge nǚháizi** "two boys, (and) one girl."

A pause is usual between the two phrases, but even the pause is sometimes omitted.

Notes on №5-7

5. B: **Shì nánháizi, shì nǚháizi?** **是男孩子，是女孩子？** Are they boys or girls?
 A: **Tāmen dōu shì nǚháizi.** **他们都是女孩子。** All of them are girls.

6. B: **Hú xiānsheng, tàitai ne?** **胡先生，太太呢？** How about Mr. and Mrs. **Hú**? **Tāmen yǒu jǐge háizi?** **他们有几个孩子？** How many children do they have?
 A: **Tāmen yǒu liǎngge háizi.** **他们有两个孩子。** They have two children.
 B: **Shì nánháizi, shì nǚháizi?** **是男孩子，是女孩子？** Are they boys or girls?
 A: **Dōu shì nǚháizi.** **都是女孩子。** Both of them are girls.

7. A: **Nǐmen háizi dōu zài zhèlǐ ma?** **你们孩子都在这里吗？** Are all your children here?
 B: **Bù, liǎngge zài zhèlǐ, yíge hái zài Měiguó.** **不，两个在这里，一个还在美国。** No. Two are here, and one is still in America.

Shì nánháizi, shì nǚháizi? In Chinese, an "or" question (i.e., a question asking which of two alternatives is true) may be asked simply by stating the two alternatives with a pause between. In this kind of question, the verb must appear in each alternative. (You will learn other ways of making "or" questions in later modules.)

Dōu may usually be translated in a sentence as "all (of)," or, if it refers to only two things, as both (of)." Literally, **dōu** means "in all cases," "uniformly," "entirely," "completely." Since it is an adverb, it must be placed after the subject of a sentence and before the verb (like the adverb **yě**, "also".)

Notes on №8-9

8. A: **Nǐ jiāli yǒu shénme rén?** **你家里有什么人？** What people are (there) in your family?

B: Yǒu wǒ tàitai gēn sānge 有我太太跟
háizi. 三个孩子。 There's my wife and three
children.

9. B: Nǐ jiāli yǒu shénme rén? 你家里有什
么人? What people are (there) in
your family?

A: Jiù yǒu wǒ fùqin, mǔqin. 就有我父
亲, 母亲. Just my father and moth-
er.

Literally, the phrase **nǐ jiāli** means "in your home" (**jiā**, "home"; **-li**, "in" #. In this sentence it is extended to mean "the people in your home," that is, "your family."

Nǐ jiāli - yǒu - shénme rén? Phrase by phrase, this question is: "In your family - there are - what people?" The word "family" can be taken to mean either all your relatives or only those living in your household.

By itself, the verb **yǒu** means "to be," "to exist." You have now seen it translated two ways:

1. as "have," with a personal subject: **Wǒmen yǒu sānge háizi** . "We have three children."
2. as "there is/are," in the so-called impersonal construction: **Nǐ jiāli yǒu shénme rén?** "What people are (there) in your family?"

In exchange 8, the verb **yǒu** in the answer is translated as "there's." Some English speakers may find this translation too colloquial. The answer can also be translated Just by listing the family members, with no verb in the English, as was done in exchange 9. Chinese almost always keeps the verb in the answer to a question, while English tends to leave it out.

How to say "and": Chinese has several words for "and." **Gēn** is the word for "and" when joining nouns or noun phrases. **Yě** is the word for "and" when joining verbs, verb phrases, or whole sentences:

Example 2.1. Example:

Wǒ bù xìng Lǐ, yě bù xìng Lǚ. Wǒ xìng Lǚ.

I'm not surnamed **Lǐ** and I'm not surnamed **Lǚ**. I'm surnamed **Lǚ**.

Chinese tends to use a word for "and" when the noun phrases being joined are not parallel and not to use one when the phrases are parallel:

Not parallel				
Yǒu	wǒ tàitai Possessor noun	gēn	sānge háizi. number noun	There's my wife and 3 children.
Parallel				
Yǒu	liǎngge nánháizi number noun	,	yíge nǚháizi. number noun	There are 2 boys and one girl.

While "and" is often omitted in Chinese, it may be added for emphasis between nouns and between noun phrases just as in English.

Jiù, "only," "Just," is an advert (like **yě** and **dōu**). The use of **jiù** to mean "only" is probably mostly confined to the Peking dialect.⁴ Speakers from other parts of the country will not necessarily use **jiù** to mean "only" or understand it as such. A more widely used and understood word for "only" is **zhǐ**. Thus the answer in exchange 9 could also be: **Zhǐ yǒu wǒ fùqin, mǔqin.**

Notes on additional vocabulary

Chinese is much more precise than English in its terms for family members. There is not just one word for "brother," or "sister" but words for "older brother," "younger brother," "older sister," and "younger sister."

	older	younger		
brother	gēge	dìdi	brothers	xiōngdì
sister	jiějie	mèimei	sisters	jiěmèi

When referring to both older and younger sisters, the term **jiěmèi** is used. When referring to both older and younger brothers, the term **xiōngdì** is used. When referring to sisters and brothers, the phrase **xiōngdì jiěmèi** is used.

Chinese also distinguishes between grandparents on the father's side of the family and grandparents on the mother's side:

	father's side	mother's side
grandfather	zǔfù	wàizǔfù
grandmother	zǔmǔ	wàizǔmǔ

The syllable **wài-** in **wàizǔfù** and **wàizǔmǔ** literally means "outer" or "outside."

⁴**Jiù** has several other meanings, which will be presented to you as you continue through this course.

Reference Notes

Notes on №1

1. A: Nǐ àiren lái ma? 你爱人来吗? Is your wife coming?
 B: Tā lái. 她来。 She is coming.

These sentences refer to future time, but **lái** is not a future-tense form. Strictly speaking, Chinese verbs do not have tenses. The same form of the verb can be used in present, past, and future contexts.

We translated the sentence **Tā zài Táinán gōngzuò**. as "He works in Tainan" assuming a present context. But in a past context we could translate it as "He worked in Tainan; and in a future context we could translate it as "He will work in Tainan." The verb form **gōngzuò** does not tell you what time is being talked about. You have to look elsewhere for that information, perhaps to a time expression like "last year" or "now" or "tomorrow," or to the conversational setting.

Notes on №2

2. A: Nǐ àiren lái le ma? 你爱人来了吗? Has your wife come?
 B: Lái le, tā lái le. 来了, 她来了。 Yes, she has come.

Aspect: **Le** is an aspect marker. Through the use of and other one-syllable markers (**de, zhe, ne, guo**), the Chinese language indicates whether the occurrence being talked about is completed, ongoing, about to occur, or experienced for the first time. Aspect markers may also be used to indicate whether the whole situation in the sentence is a new, changed situation.

"Completion" and "new situation" are not tenses but aspects. Aspect is a way of talking about events or activities in relation to time. While tenses categorize action in terms of features such as completeness and change. Aspect markers are very different from tense markers because the same aspect may be used in past, present, and future contexts. We may speak of an action that will be completed as of a future time, for example, or of a situation that was new as of a past time. English communicates these ideas to a certain extent through the use of many different tenses for the verb (future perfect, simple past, etc.). Chinese does this through the use of aspect markers and time words. The verbs themselves do not change form.

Le is used in exchange 2 to indicate two aspects-completion and new situation, (it is, however, often used to indicate only one aspect.)

Here, it indicates that the person has come, meaning that the action is completed, and that the person is now here, a changed situation. When the marker **le** refers to both these aspects, we call it "combined **le**." Combined **le** can be thought of as a telescoping of the completion **le** followed by a new-situation **le:le**

le becomes le. In the next two units, you will see the marker le used to indicate each of these aspects separately.

Notes on №3

3. A: Nǐ àiren yě lái le ma? 你爱人也来了吗? Has your wife come too?
 B: Tā hái méi lái. 她还没来。 She hasn't come yet.

Negative of combined le: Compare these affirmative and negative forms:

affirmative			lái		is coming.
negative		bù	lái		isn't coming.

affirmative			lái	le	has come (now).
negative	hái	méi(you)	lái		hasn't come (yet).

Notice that the marker le does not appear in the negative answer in the exchange.

Hái: The negative of a sentence containing combined le_ will include the adverb hái, "yet," as well as the negative méi(you). In English, the "yet" is frequently left out.

Like other adverbs such as yě, hái always precedes the verb, although not always directly. Elements such as the negatives and méi may come between an adverb and a verb,

Méiyou, "not have" is used to negate the aspect of completion; that is, to say that a certain event did not take place. **Méiyou** may be shortened to **méi**. Here are three possible negative answers to the question.

Tā lái le ma? "Has he come?"

Tā	hái	méiyou	lái.	He hasn't come yet.
Tā	hái	méi	lái.	He hasn't come yet.
	hái	méiyou.		Not yet.

Notes on №4-5

4. A: Tā shénme shíhou lái? 她什么时候来? When is she coming?
 B: Tā míngtiān lái. 她明天来。 She is coming tomorrow.

5. A: Nǐ péngyou shénme shíhou dào? 你朋友什么时候到? When is your friend arriving?
 B: Tā yǐjīng dào le. 他已经到了。 He has already arrived.

Position of time words: Time phrases occupy the same position in a sentence as adverbs such as **yě** and **hái** between the subject and the verb.

Notes on №6-7

6. A: **Tā shì shénme shíhou** 她是什么时候到的？ When did she arrive?
 B: **Tā shì zuótān dàode.** 她是昨天到的。 She arrived Yesterday.

7. A: **Nǐ shì yíge rén láide ma?** 你是一个人来的吗？ Did you come alone?
 B: **Bú shì, wǒ bù shì yíge rén láide.** 不是，我不是一个人来的。 No, I didn't come alone.

(shì)...de:⁵ This is another way to indicate the aspect of completion. The aspect marker **le** and the pattern **(shì)...de** perform different functions and convey different meanings. This is how they are different:

The aspect marker **le** or its negative **méi (you)** is used when the center of interest is whether or not an action took place. For example, if you do not know whether Mr. Sun came or not, you would ask:

Tā léile méiyou?	Did he come?
-------------------------	--------------

and you would be answered either

Tā láile.	He came.
------------------	----------

or

Tā méi lái.	He didn't come.
--------------------	-----------------

In this question and answer, you use **le** or its negative **méi(you)** because the focus is on whether the action took place or not.

The purpose of the **(shì)...de** construction, on the other hand, is to focus on additional information about a completed action; that is, the construction is used when the center of interest is NOT whether or not a certain action took place.

For example, once it has been established that Mr. Sun did in fact come, the **(shì)...de** construction will probably be used for any additional questions and answers about his coming. For example:

Tā shi shénme shíhou láide?	When did he come?
Tā shi zuótān láide.	He came yesterday.
Tā shi yíge rén láide ma?	Did he come alone?
Tā shi yíge rén láide.	He came alone.

⁵On occasion, a speaker may omit the **shì** (which is why it is written in parentheses in these notes).

These questions and answers use the (shì)...de construction because you already know that Mr. Sun came and now you are asking for additional information about his visit. Many types of additional information can be focus points for which the (shì)...de construction is used.

In **Tā shi shénme shíhou láide?** the additional information is the time when something happens.

In **Tā shi yíge rén láide ma?** the information asked for is the manner in which something takes place.

Other possible focus points are place, cause of action, goal of action, and performer of action.

Now let's take a look at how **shì** and **de** function separately in this construction. The verb **shì**, coming before the phrase which is the center of interest, serves as a signal that what follows is emphasised. The verb "to be" is often used in a similar way in English to mark the center of interest:

Tā shi zuótiān láide ma?	Was it yesterday that he came?
---------------------------------	--------------------------------

Another way of showing the center of interest in English is by word stress. Here is a comparison between focusing in Chinese with (shì)...de and focusing in English with stress:

Tā lái le ma?	Has he come?
Lái le.	Yes, he has.
Tā shi zuótiān láide ma?	Did he come YESTERDAY?
Shì, tā shi zuótiān láide.	Yes, YESTERDAY.

The marker **de** coming after the verb indicates completion. When the marker **de** is not used in the sentence, that sentence no longer describes a completed event. The marker **shì** by itself emphasizes something about the action.

Compare these sentences:

Tā shi jíntiān lái.	She is coming (later) today.
Tā shi jíntiān láide.	She came (earlier) today.

For the time being, you will not use **shì** without **de**.

The negative form of the (shì)...de construction is **bú shi...de**. Compare this with the negatives you have already learned:

Tā		shi	zuótiān		lái	-de	It was YESTERDAY that he came.
Tā	bú		zuótiān		lái	-de	It wasn't YESTERDAY that he came.

Tā				lái	le.	He has come.
Tā			hái	méi	lái.	He hasn't come.

Tā			míngtiān		lái.		He is coming tomorrow.
Tā			míngtiānbù		lái.		He isn't coming tomorrow.

Notice that in a (shì)...de construction the negative **bú** precedes the verb **shì** rather than the main verb. Short answers are also formed with **shì** rather than with the main verb:

Nǐ shi yíge rén láide ma?	Did you come alone?
Shì, wǒ shì yíge rén láide.	Yes, I came alone.
Búshì, wǒ bú shi yíge rén láide.	No, I didn't come alone.

The (shì)...de construction is not used in every completed-action sentence containing a time, place, or manner phrase. If the center of interest is still whether or not the action took place, **le** is used. If, for example, you knew that someone was expected to come yesterday and you wanted to find out only whether he actually did come, the conversation might go as follows:

A: Tā zuótān méi lái ma?	Didn't he COME yesterday?
B: Tā zuótān lái le.	He DID COME yesterday.

Literally, **yíge rén** means "one person." When the expression is used to describe how someone does something, translate it as "alone"

Notes on №8-9

8. A: Nǐ shénme shíhou zǒu? 你什么时候走? When are you leaving?
 B: Wǒ jīntiān zǒu. 我今天走。 I'm leaving today.

9. A: Nǐ něitiān zǒu? 你哪天走? What day are you leaving?
 B: Wǒ jīntiān zǒu. 我今天走。 I'm leaving today.

The word for "day" is the bound word **-tiān**. To ask "what day" (literally "which day"), the bound word **něi-** "which," is combined with the bound word **-tiān**, "day": **něitiān** (like **néiguó**, "which country").

něitiān?	what day?/which day?
qiántiān	day before yesterday
zuótān	yesterday
jīntiān	today
míngtiān	tomorrow
hòutiān	day after tomorrow

Some speakers say the **-tiān** in these words in the Neutral tone: **qiántian**, **zuótian**, **jīntian**, **míngtian**, **hòutian**.

Until now, you have always seen **jǐ**, "how many," at the beginning of a word (**jǐge háizi, jǐwèi xiānsheng, jǐhào**). In **xīngqījǐ**, **-jǐ** is at the end of the word. In both places, occupies the position of a number and acts like a number: **xīngqījǐ**, "What number day of the week?"

Notes on №4

4. A: Nǐ shì něinián shēngde? 你是哪年生的?
B: Wǒ shì Yī jiǔ sān jiǔ nián shēngde. 我是一九三九年生的。

What year are you born?

The word for "year," **-nián** is a bound word (like the word for "day," **-tiān**). The question word **něinián**, "which year," is formed with the bound word **něi** "which."

The year is given as a sequence of digits, so that 1972, **Yījiǔqīèrnián** would literally be "one-nine-seven-two year." In a sequence of digits, the word **èr-** (not **liǎng-**) is used for 2, and the words for 1, 7, and 8 keep their basic high tones. (See notes on No. 10 for cases in which these tones change.)

Notes on №5

5. A: Nǐ shì jǐyüè shēngde? 你是几月生的?
B: Wǒ shì Qíyüè shēngde. 我是七月生的。

What month were you born?

Months:

jǐyüè?	What month?		
yíyüè	January	qíyüè	July
èryüè	February	báyüè	August
sānyüè	March	jiǔyüè	September
sìyüè	April	shíyüè	October
wǔyüè	May	shíyīyüè	November
liùyüè	June	shíèryüè	December

Since the names of the months are formed with numbers, **jǐ-** "how many," is the appropriate question word to use for "what month." **Jǐ-** is used in **Běijīng** to ask for a number expected to be around 10 or 11.

Notice the tones on the words for 1, 7 and 8, which most Peking speakers pronounce as Rising before Falling-tone words such as **yüè**. The syllable **-yǐ-** in the word for "November," however, is usually pronounced with the High tone: **shíyīyüè** (See the notes on No. 10 for a summary of tone changes.)

Notes on №6

6. A: Nǐ shì jǐhào shēngde? 你是几号生的?
B: Wǒ shì Sìhào shēngde. 我是四号生的。

What day of the month were you born?
I was born on the fourth.

Days of the month are expressed by the number of the day followed by the bound word **-hào**. You will remember that **-hào** is also used in giving addresses.

In asking about days of the month, "how many" is used, even though the question may be answered by a number as high as 31. The month and day of the month may be given together. For example:

Nǐ shi jǐyüè jǐhào shēngde?	What is your month and day of birth?
Wǒ shi bāyüè jiǔhào shēngde.	I was born on August 9.

Notes on №7-8

7. A: Nǐ duó dà le? 你多大了? How old are you?
B: Wǒ èr shi sì le. 我二十四了。 I'm 24.

8. A: Nǐ duó dà le? 你多大了? How old are you?
B: Wǒ sān shi wǔ le. 我三十五了。 I'm 35.

Nǐ duō dà le? "How old are you?" literally means "How big (in years of age) are you?" This is a common way to ask a person's age. The question is appropriate for asking the age of a child or a young adult, but the expression is not considered polite enough for asking an older adult his age. (More formal ways to ask a person's age will be introduced on the C-2, P-2, and drill tapes.)

The marker **le** which ends these sentences calls attention to the fact that something is true now that was not true before.

 Note

Ages may also be asked and given without using the new-situation **le**.

Le has only this new-situation meaning in these sentences. It has no meaning of completion, since in fact, there is no completed event.

One way to reflect the new-situation **le** in the English translation is to add the word "now": I'm 35 now. Essentially, however, "new situation" (sometimes called change of state) is a Chinese grammatical category with no simple English equivalent.

The marker **le** for new situations is always found at the end of a sentence and is sometimes called "sentence **le**."

Notice that neither answer contains a verb. The verb that has been left out is **you** "to have." The verb may not be left out in the negative: **Wǒ méiyǒu sānshíwǔ.** "I'm not 35."

Notes on №9

9. A: **Nǐmen nǚháizi jǐsuì le?** 你们女孩子几岁了？ How old is your girl?

B: **Tā bāsuì le.** 她八岁了。 She's eight years old.

-suì: In the traditional Chinese system of giving ages, a person is one -sui old at birth and becomes another -sui old on the New Year's following his birth. A baby born the day before New Year's would thus be two -sui old on the day after his birth. Most Chinese, however, have now switched to the Western style of computing age and use -sui just as we use years old.

The word -sui like the word -hào, is a bound word showing what kind of thing a number is counting.

In a date or address you are listing a number and use èr for 2, while in giving an age you are counting an amount of something and use liǎng: liǎngsuì, "two years old."

Notes on №10

10. A: **Nǐmen nánháizi dōu jǐsuì le?** 你们男孩子都几岁了？ How old are your boys?

B: **Yíge jiǔsuì le, yíge liùsuì 一个九岁了,** 一个六岁了。 One is nine, and one is six.

The word **dōu** is used when "both" or "all" would probably not be used in English, namely, when expecting different information about each of the things (or persons) being discussed. "All" tends to be collective, asking or telling about something the members of a group have in common. **Dōu** can be distributive, asking or telling something about the members of a group as individuals.

Yí, qí, bá: In the spoken language of Peking, the basic High tones of **yī**, **qī** and **bā** usually change to Rising tones before Falling-tone words (such as -hào, yüè, and -sui). This change is most common when the complete number given has only one digit. When there are two or more digits, the **qī** and **bā** of numbers ending in 7 and 8 are more likely to have Rising tones than the **yī** of numbers ending in 1 (which is usually in the High tone).

Compare:

shíqīhào	the 17th
shíyīyüè	November

In all cases, the High tone is more likely to be kept in rapid speech. You may also encounter speakers who never make changes in the tones of **yī**, **qī** and **bā**.

Remember that, in the digit-by-digit form of giving the year, the numbers 1, 7, and 8 keep their basic High tones: **Yījīǔbāliùnián** 1986.

Notes on additional required vocabulary

Days	qiántiān	zuótīān	jīntiān	mīngtiān	hòutiān
Years	qiánnián	qùnnián	jīnnián	míngnián	hòunián

In the Chinese system of expressing relative time in terms of days and years, only one pair of terms is not parallel: **zuótīān** "yesterday," and **qùnnián** "last year."

Note

added by Eric Streit with the explanations given by a Chinese native about the drills I and the use of **suìshu** 岁数 and **Niánjì** 年纪

- **suìshu** 岁数 and **Niánjì** 年纪 usually and mostly refer to OLDER people that you ask for. **suìshu** 岁数 is very spoken though. And less polite.
- For kids especially, you only need to do **多大了?** **duó dà le?** or **几岁了?** **jǐsuì le?**
- with **几岁了?** neither **suìshu** 岁数 nor **Niánjì** 年纪 .

Reference Notes

Notes on №1

1. A: Nǐ zhù duó jiǔ? 你住多久? How long are you staying?
 B: Wǒ zhù yìnián. 我住一年。I'm staying one year.

Expressions like **duó jiǔ**, "how long," and **yìnián** "one year," called duration phrases, come after the verb.

Note

"One day" is **yìtiān**. The tone on **yī** changes to Falling before a High-tone.

Notice the contrast with time-when phrases, like **shénme shíhou**, "when," and **jīnnián** "this year," which come before the verb.

If a duration phrase is used with the verb **zhù**, this phrase preempts the position after the verb; and any place phrase, like **zài Běijīng**, must come before the verb.

Yìnián: In telling how many years (giving an amount) no counter is used. The tone on **yī**, "one," changes to Falling before a Rising tone.

Notes on №2

2. A: Nǐ tàitai zhù duó jiǔ? 你太太住多久? How long is your wife staying?
 B: Ta zhù liǎngtiān. 她住两天。She is staying two days.

Liǎngtiān: **-tiān**, "day," like **-nián**, "year," is used without a counter. When telling how many of something, the number 2 takes the form **liǎng**. (See Unit 3, notes on Nos. 3-4.)

Notes on №3-4

3. A: Nǐ tàitai zài Xiānggǎng zhù duó jiǔ? 你太太在香港住多久? How long is your wife staying in Hong Kong?
 B: Wǒ xiǎng tā zhù liǎngtiān. 我想她住两天。I think she is staying two days.

4. A: Nǐ xiǎng zhù duò jiǔ? 你想住多久? How long are you thinking of staying?
 B: Wǒ xiǎng zhù yìnián. 我想住一年。I'm thinking of staying one year.

The verb **xiǎng**, "to think that," "to want to," "would like to," may be used as a main verb or as an auxiliary verb. As a main verb it means "to think that." It is used this way in the answer of exchange 3 and in the following examples.

	I think he is coming tomorrow.
	I think he is not going.

When **xiǎng** is used as a main verb meaning "to think that," it is not made negative. This may be a special problem for English speakers who are used to saying "I don't think he is going."

In Chinese, it is: "I think he is not going" **Wǒ xiǎng tā bù qù**.

When **xiǎng** is used as an auxiliary verb, it means, "to want to," "would like to." It is used this way in exchange 4, which could also be translated as, "How long would you like to stay?"

Here are other examples:

Nǐ xiǎng zǒu ma?	Would you like to leave? OR Do you want to go?
Wǒ bù xiǎng zǒu.	I don't want to leave.
Nǐ xiǎng zài Táiběi gōngzuò ma?	Do you want to work in Taipei?

Notes on №5-6

5. A: Nǐ xiǎng zài Táiwān zhù 你想在台湾住多久? How long are you thinking of staying in Taiwan?
 B: Wǒ xiǎng zhù bā ge yuè. 我想住八个月。I'm thinking of staying eight months.

6. A: Nǐ péngyou xiǎng zhù duó jiǔ? 你朋友想住多久? How long is your friend thinking of staying?
 B: Tā xiǎng zhù liǎng ge xīngqī. 他想住两个星期。He is thinking of staying two weeks.

You already know that **yìnián** and **yìtiān** are used without counters. The words for "month" and "week," however, are used with counters.

Compare:

sāntiān	3 days
sānnián	3 years
sānge xīngqī	3 weeks

sānge yüè	3 months
-----------	----------

Notes on №7

7. A: Nǐ láile duó jiǔ le? 你来了多久了? How long have you been there?
 B: Wǒ láile sāntiān le. 我来了三天了。 I have been here three days.

le...le, "up until now," "so far": The use of completed-action le after the verb and of new-situation le after the duration phrase tells you how long the activity has been going on and that it is still going on. The answer could also have been translated "I have been here three days so far." This pattern is sometimes called "double le."

Notice that when **le** is in the middle of a sentence (in this case, because it is followed by a duration phrase), we write it attached to the verb before it: láile duó jiǔ le.

Notes on №8

8. A: Nǐ tàitai zài Xiānggǎng zhùle duó jiǔ? 你太太在香港住了多久? How long did your wife stay in Hong Kong?
 B: Tā zhùle liǎngtiān. 她住了两天。 She stayed two days.

Completion le: Here you see the marker le used to indicate one aspect, completion. Compare a sentence with one le to a sentence with two le's:

Wǒ zài nàr zhùle sāntiān.	I stayed there three days.
Wǒ zài nàr zhùle sāntiān le.	I have been here (stayed here) for three days now (so far).

Completion **le** is used with verbs that describe actions or processes, not with verbs that describe a state or condition, or a continuing situation. The following sentences, describing states or ongoing situations, have past-tense verbs in English but no **le** in Chinese.

Nèige shíhou tāmen zhǐ yǒu liǎng héizi.	At that time they had only two children.
Tā qùnián bù zài Shànghǎi, zài Běijīng.	He wasn't in Shànghǎi last year; he was in Běijīng.

Verb types in Chinese: In studying some languages, it is important to learn whether a noun is masculine, feminine, or neuter. In Chinese, it is important to learn whether a verb is an action, state, or process verb. These three verb categories are meaning (semantic) groups. A verb is a member of one group or another depending on the meaning of the verb. For instance, "running" and "dancing" are actions; "being good" and "being beautiful" are states; and "getting sick" and "melting" are processes. In Chinese, grammatical rules are applied

differently to each semantic verb category. For the most part, you have learned only action and state verbs in this course; so these comments will be confined to those two verb categories. (See Unit 8 of this module for process verbs.)

Action verbs: These are verbs which describe physical and mental activities. The easiest to classify are verbs of movement such as "walking," "running," and "riding", however, action verbs also include verbs with not too much motion, such as "working" and "writing," and verbs with no apparent motion, such as "studying." One test for determining if a verb is an action is asking "What did he do?" "He arrived," "He spoke," and "'He listened" are answers which contain action verbs. "He knew" "He wanted" and "He is here" are answers which contain state verbs, not action verbs. Some of the action verbs you have learned are:

dào (to arrive)	lái (to come)
gōngzuò (to work)	zhù (to live, to stay)

State verbs: These verbs describe qualities, conditions, and states. All adjectival verbs, such as **hǎo** "to be good," and **jiǔ**, "to be long (in time)," are state verbs. Emotions, such as "being happy" and "being sad," are expressed with state verbs. "Knowing," "liking," "wanting," and "understanding," which may be called mental states, are also expressed with state verbs. Also, all auxiliary verbs, such as **xiǎng**, "to want to," "would like to," are state verbs. Here are some of the state verbs:

dà to be large	shì to be
duì to be correct	jiào to be called
xìng to be surnamed	zài to be at
xiǎng to want to	zhīdào to know

Aspect and verb types: Not every aspect marker in Chinese may be used with all types of verbs. Completion **le** does not occur with state verbs. It does occur with action verbs.

ACTION	Tā yǐjīng dào le.	He has already arrived.
	Tā gōngzuòle yìnián.	He worked one year.
	Tā lái le ma?	Did he come?
STATE	Tā qùnián bù zài zhèr.	He wasn't here last year.
	Tā zuótíān xiǎng qù.	Yesterday he wanted to go.
	Tā zuótíān bù zhīdào.	He didn't know yesterday.

Notes on №9-10

9. A: Tā lái le ma? 他来了吗? Did he come?

B: Lái le, tā lái le. 来了, 他来了。 Yes, he came.

10. A: Tā lái le ma? 他来了吗? Did he come?

B: Méi lái, tā méi lái. 没来, 他没来。 No, he didn't come.

Compare the two possible interpretations of the question **Tā lái le ma?** and the answers they receive:

Completion **le**

Tā		lái	le	ma?	Did she come?
Tā		lái	le.		She came.
Tā	méi	lái			She didn't come.

Combined **le**

Tā			lái	le	ma?	Has he come?
Tā			lái	le.		She has come. OR She's here.
Tā	hái	méi	lái.			She hasn't come yet.

The first question, with completion **le**, asks only if the action took place. The second question, with combined **le** asks both whether the action has been completed and whether the resulting new situation still exists.

Notes on №11

11. A: **Nǐ cóngqián láiguo ma?** 你从前来过吗? Have you ever been here before?
 B: **Wǒ cóngqián méi láiguo.** 我从前没来过。 I have never been here before.

The aspect marker **-guo** means literally "to pass over," "to cross over. The implication is that an event took place and then ceased at some time in the past.

It may help you to conceptualize **-guo** in terms of a bridge. The whole bridge is the event. The marker **-guo** stresses the fact that not only have you crossed over the bridge but at present you are no longer standing on it.

The meaning of **-guo** changes slightly depending on what type of verb it is used with: action or process, (**-guo** may not be used with state verbs.) With an action verb, **-guo** means that the action took place and then ceased at some time before the present. With a process verb, **-guo** means that the process took place and that the state which resulted from the process ended at some time before the present.

Remember that aspect markers like **le** and **-guo** are used only when the speaker feels it necessary to stress some feature or aspect of an event. **Le** is used to stress finishing, or completion, **-guo** is used to stress that a situation occurred in the past and was "over or "undone," before the time of speaking (that is, the absence of that situation followed the situation).

Let's contrast **-guo** with completion **le**: both **le** and **-guo** express completion, but **-guo** stresses that an action is no longer being performed, or that a state resulting from a process no longer exists.

For example, **Tā lái le.** means "He came," or "He has come," not indicating whether or not he is still there.

But **Tā láiguo** means "He came" with the specification that he is not there anymore -that is, he came and left.

One of the uses of the aspect marker **-guo** is in sentences which express experience or having experienced something at least once in the past, that is, "to have had the experience of doing something." This is how **-guo** is used in exchange 11. In a question, the marker **-guo** can be reflected by the English word "ever," and in a negative statement by "never."

Nǐ	cóngqiān	lái	-guo	ma?	Have you ever been (come) here before?
Nǐ	cóngqiánéi	lái	-guo		I have never been (come) here before.
Nǐ	cóngqián	lái	-guo		I have been (come) here before

The negative of **Tā lái le.** does not include a **le**, but the negative of **Tā láiguo.** does have a **-guo**. The negative adverb **méi** is used to negate both completion **le** and **-guo**.

Tā			lái	le.
Tā	méi		lái	
Tā			lái	-guo.
Ta	méi		lái	-guo.

Reference Notes

Notes on №1-2

1. A: Nǐn zài náli gōngzuò? 您在哪里工作? Where do you work?
 B: Wǒ zài Měiguó Guówùyùàn gōngzuò. 我在美国国务院工作。I work with the State Department.

2. A: Nǐn zài náli gōngzuò? 您在哪里工作? Where do you work?
 B: Wǒ shì xuésheng. 我是学生。I'm a student.

Zài Měiguó Guówùyùàn gōngzuò means either "work at the State Department" (i.e., at main State in Washington, D.C.) or "work in the organisation of the State Department" (no matter where assigned). Here the expression is translated loosely as "work with the State Department," meaning "in the organization."

Notes on №3-4

3. A: Nǐn lái zuò shénme? 您来做什么? What did you come here to do?
 B: Wǒ lái niàn shū. 我来念书。I came here to study.

4. A: Òu, wǒ yě shì xuésheng. 哦, 我也是学生。Oh, I'm a student too.
 B: Qǐngwèn, nǐ niàn shénme? 请问, 你念什么? May I ask, what are you studying?
 B: Wǒ niàn lìshǐ. 我念历史。I'm studying history.

Purpose: When **lái**, "to come," is followed by another verb, the second verb expresses the purpose of the subject's coming. The "purpose of coming" may be emphasized by the **shì...de** construction, with the marker **shì** before the verb **lái**:

Wǒ shì lái nián shūde. | I came to study.

Niàn shū: **Niàn** by itself means "to read aloud." When followed by an object, the expression means "to study." **Shū** is "book(s)," but **niàn shū** simply means "to study." **Shū** is used as a general object, standing for whatever is being studied.

Niàn lìshǐ: When you are talking about studying a particular subject, **niàn** is followed by the name of that subject rather than by the general object **shū**.

To have the meaning "to study," **niàn** must be followed by either the general object **shū** or a specific object such as the name of a subject.

Verb types: **Zuò**, "to do," and **niàn (shū)**, "to study," are action verbs. Both are made negative with **bu** when referring to actions not yet finished. Both may take completion **le** or its negative **méi**.

Tā bù niàn shū.	He doesn't study.
Tā méi niàn shū.	He didn't study.
Tā yǐjǐng niàn shù le.	He has already studied.

Notes on №5-6

5. A: Kě xiānsheng, nǐ niàn 可先生, 你念什么?
shénme?
B: Wǒ zài zhèli xüé zhōng- 我在这里学
wén. 中文。

What are you studying,
Mr. Cook?
I'm studying Chinese
here.

6. A: Qǐngwèn, nǐ xüéguo Yīng- 请问, 你学
wén ma? 过英文吗?
B: Xüéguo 学过。

May I ask, have you ever
studied English?
Yes.

Xüé, "to study" #an action verb): You will recognize **xüé** from the word for "student," **xuésheng**. **Xüé** may refer to acquiring either knowledge or a skill. For example, you can **xüé** history, economics, a language, piano# and tennis. On the other hand, **niàn** is used for "study" in the sense of taking a course or courses in a field of knowledge. **Niàn** is not used for a skill.

In some contexts, the verb **xüé** means "to learn." The following sentence may be interpreted two ways, depending on the situation.

Wǒ zài Měiguó yǐjǐng xüéguo.	I learned it in America.(e.g., how to use chopsticks)
	OR I studied it in America. (e.g., the Chinese language)

Zhōngwén is used for either the Chinese spoken language or the written language# including literature. In general, use **xüé** for "learning" to speak Chinese and **niàn** for "studying" Chinese literature.

Notes on №7-8

7. A: Qǐngwèn, nǐ huì shuō 请问, 你会
Yīngwén ma? 说英文吗?
B: Wǒ huì shuō yìdiǎn. 我会说一
点。

May I ask, can you speak
English?
I can speak a little.

8. A: Nǐ tài tai yě huì shuō 你太太也会说中国话吗?
Zhōngguó huà ma? Can tour wife speak Chinese too?

B: Bú huì, tā bú huì shuō. 不会, 她不会说。 No, she can't.

Huì, "to know how to," "can," is an auxiliary verb. It is used before the main verb to express an attitude toward the action or to express the potential of action. **Xiǎng**, "to want to," "would like to," is also an auxiliary verb. "Should," "must," and "may" are other examples of auxiliary verbs. All auxiliary verbs in Chinese are state verbs, which means that **bù** is always used to make them negative. Auxiliary verbs never take the aspect marker **le** for completed action, regardless of whether you are talking about past, present, or future.

Tā qūnīán bú huì shuō Yīngwén.	He couldn't speak English last year.
--------------------------------	--------------------------------------

When the marker **le** is used, it is the aspect marker for new situations.

Tā qūnīán bú huì shuō Yīngwén, xiànzài huì le,	Last year he couldn't speak English, but now he can.
--	--

Wǒ huì shuō yìdiǎn, "# can speak a little": The word **yìdiǎn**, literally "a dot," functions as a noun. It is used in a sentence to mean "a little bit" where a noun object, such as **Yīngwén**, "English," might be used.

Yìdiǎn may not be used directly after an auxiliary verb, which must be followed by another verb.

Shuō, "to speak," "to talk," is another example of a verb which must always have an object. **Shuō** must be followed by either:

1. the general object **huà**, "words," in which case the meaning of **shuō huà** is simply "to speak," "to talk," as in:

Tā hái méi shuō huà.	He hasn't yet spoken.
----------------------	-----------------------

OR

2. a specific object such as the name of a language.

Bú huì: The short yes/no answer to a question containing the auxiliary verb **huì** is formed with **huì** rather than with the main verb.

Zhōngguó huà: This expression refers only to the spoken language, in contrast to **Zhōngwén**, which refers to both the spoken and written language.

Notes on №9

9. A: Nǐde Zhōngguó huà hěn 你的中国话很好。
hǎo. Your Chinese is very good.

B: Náli, náli. wǒ jiù shuō 哪里, 哪里。我就说
yìdiǎn. 一点。 Not at all, not at all. I can speak only a little.

Literally, **náli** means "where." As a reply to a compliment, we have translated **náli** as "not at all." In China, it has traditionally been considered proper and a matter of course to deny any compliment received, no matter how much truth there is to it. Many people still regard **xièxie** "thank you," as an immodest reply to a compliment, since that would amount to agreeing that the compliment was completely correct.

Jiù, "only": As was noted in Unit 3, notes on Nos. 8-9, **jiù** meaning "only" is not as widely understood as **zhǐ**. The last sentence in exchange 9 could just as well be **Wǒ zhǐ huì shuō yìdiǎn**.

Notes on №10-11

11. A: **Nǐ shì zài dàxué xüéde** 你是在大学
Yīngwén ma? 学的英文
吗?

B: **Shìde, wǒ shì zài Táiwān** 是的，我是
Dàxué xüéde Yīngwén. 在台湾大学
学的英文。

Did you study English at college?
Yes, I studied English at Taiwan University.

In the Peking dialect of Standard Chinese, which is the model for grammatical patterns presented in this course, the **-de** of a **shì...de** construction comes between the verb and its object. The object, therefore, is outside the **shì...de** construction. Compare "I studied here" with "I studied English here":

However, you may hear some Standard Chinese speakers who place the object inside the **shì...de** construction.

Wǒ	shì	zài zhèr	xüé	-de.	
Wǒ	shì	zài zhèr	xüé	-de	Yīngwén.

Reference Notes

Notes on №1

1. A: Nǐ jīntiān hái yǒu kè ma? 你今天还有课吗?
B: Méiyou kè le. 没有课了.

Do you have any more classes today?
I don't have any more classes.

Hái, "additionally," "also": You have already learned the word **hái** used as an adverb meaning "still." In this exchange you learn a second way to use **hái**.

Nǐ hái xiǎng zǒu ma?	Do you still want to leave?
Nǐ hái yào xüé shénme?	What else do you want to study?

Méiyou...le: You will remember that in the negative of a completed action, **méi** or **méiyou** replaces the completion marker **le** is never used together with it.

Tā		lái	le.	He came.
Tā	méi(you)	lái.		He did not come.

In the sentence **Méiyou kè le**, **le** is a new-situation marker, and **méiyou** is simply the negative of the full verb **yǒu**. (Remember that the verb **yǒu** is always made negative with **méi**, never with **bù**.)

Tā		yǒu kè	le.	Now he has class. [Due to a change in the schedule, he now has class at this time.]
Tā	méi-	yǒu kè	le.	He doesn't have any more classes.

Bù...le/méiyou...le: When the marker **le** for new situations is used with a negative verb, there are two possible meanings:

1. one is that something that was supposed to happen is now not going to happen.
2. the other is that something that was happening is not happening anymore.

Thus the following sentence is ambiguous:

Tā bù lái le.	He is not coming now. [Either he was expected to come but changed his mind, or he used to come at this time but now has stopped.]
---------------	---

In the context of a conversation, the meaning of the sentence would become clear.

Here are more-examples with the "anymore" meaning:

Tā bú niàn shū le.	He is not going to study anymore.[He will no longer attend college.]
Tā bú shi wǒde péngyou le.	He is not my friend anymore.

Méiyou le. | There is no more.

Notes on №2

2. A: Nǐ cóngqián niàn Yīngwén 你从前念英
niànle duō jiǔ? 文念了多
久?
B: Wǒ niàn Yīngwén niànle 我念英文念
liǔnián. 了六年。

How long did you study English?
I studied English for six years.

More on duration: In Unit 6 of this module, you learned to express duration in a sentence with no object (Wǒ zài Xiāngāng zhùle yuè le.). In this unit, you learn one way to express the duration of an activity which involves using both a verb and an object (e.g., "studying economics"). In such cases, the verb appears twice in the sentence: first when the object is stated, and again when the duration is stated.

Tā niàn jīngjixué, niánle yìnián.	He studied economics for one year.
Tā xué Zhōngguo huà, xüéle sānghé yüè le.	He has been studying Chinese for three months.

Notice that aspect markers do not occur after the first verb in each sentence, but only after the second verb and at the end of the second sentence.

Notes on №3

3. A: Nǐ xiànzài niàn shénme 你现在念什
ne? 么呢?
B: Wǒ niàn Fàwén ne. 我念法文

What are you studying now?
I'm studying French.

Ne is an aspect marker used to emphasize the fact that something is in progress. With action verbs, **ne** indicates that the action is going on.

With state verbs, **ne** shows that the state exists. With some process verbs, **ne** indicates that the process is going on. **Ne** may not be used with certain process verbs. (See also notes on No. 8, about verbs.)

Notes on №4-5

4. A: Nǐ niàn Fàwén niánle duō 你念法文念
jiǔ le? 了多久了?
B: Wǒ niánle yìnián le. 我念了一年
了。

How long have you studying French?
I've have been studying it for one year.

5. A: Nǐ huì xiě Zhōngguo zì 你会写中国
ma? 字吗?
B: Huì yìdiǎn. 会一点。

Can you write Chinese characters?
I can a little.

Xiě Zhōngguo zì: The verb **xiě**, "to write" can occur with specific objects, such as **Zhōngguo zì**, as well as with the general object **zì**. The combination **xiě zì** can mean either "to write characters" or simply "to write."

Tā xiǎng xüé Zhōngguo zì.	He wants to learn to write Chinese characters.
Xiǎo dìdì sìsuì le, yǐjīng huì xiě zì le.	Little younger brother is four years old and already can write.

In the reply **huì yìdiǎn**, **huì** is used as a main verb --not as an auxiliary verb, as in the question.

As a main verb, **huì** means "to have the skill of," "to have the knowledge of," "to know."

Wǒ huì Yīngwén.	I know English.
-----------------	-----------------

Notes on №6

6. A: **Qùnián wǒ hái bú huì xiě.** **去年我还不
会写。** Last year, I couldn't write them.
B: **Xiànzài wǒ huì xiě yìdiǎn** **现在我会写
一点点了。** Now, I can write a little.

Qùnián wǒ hái bú huì xiě.: Notice that here it is the auxiliary verb **huì**, not the verb **xiě**, that is made negative. Auxiliary verbs such as **huì** and **xiǎng** are STATE verbs and so are made negative with the prefix **bù**, regardless of whether the context is past, present, or future.

Xiànzài wǒ huì xiě yìdiǎn le.: The marker used is **le** for new situations. It is always placed at the end of a sentence.

The time word **xiànzài** comes at the beginning of the sentence here. Most time words of more than one syllable may come either before or after the subject, but in either case before the verb.

Notes on №7-8

7. A: **Nǐ fùqin shi jūnrén ma?** **你父亲是军
人吗？** Is your father a military man?
B: **Shì, tā shi hǎijūn jūnguān.** **是，他是海
军陆军。** Yes, he is a naval officer.

8. A: **Wǒ jīntiān bù lái le.** **我今天不
来了。** I'm not coming today.
B: **Wǒ bìng le.** **我病了。** I'm sick.

The verb **bìng**, "to get sick," "to become ill," is a process verb; that is the activity described includes some changes in the situation. Process verbs tell of an action which has caused a change from one state to another, as from whole to broken

("to break") and from frozen to melted ("to melt"). **Bìng** is typical of process verbs: not only is an action described (coming down with an illness) but also a resulting state (being ill). Because of this typical combination, process verbs are sometimes thought of as combining the semantic characteristics of action and state verbs.

One of the main purposes of talking about verbs in terms of action, state, and process is to draw attention to the fact that the Chinese way of expressing something may not correspond to the English.

For instance,

"I am sick" in Chinese is **Wǒ bìng le**. ("I have gotten sick"). For "I am not sick," you say **Wǒ méi bìng**. ("I didn't get sick").

Process verbs are always made negative with **m|i9** regardless of whether you are referring to past, present, or future.

Nǐ bìng le méiyou?	Are you sick?
Méiyou. Wǒ méi bìng.	No. I'm not sick.

(State verbs are always made negative with **bù**.)

Another reason for putting verbs into categories according to the type of meaning is to discover how verbs behave in sentences. Knowing whether a verb is in the action, state, or process category, you will know what aspect markers and negatives may be used with that verb. In the following charts, a check mark means that this combination of verb and aspect occurs in the language.

		Aspect Markers		
		Completion le	Combined le	New-situation
Verbs	Action	X	X	X
	State			X
	Process	X	X	X

Examples:⁶

Action	Tā zuótān gōngzuò le.	He worked yesterday. (completion Le)
	Tā yǐjīng lái le.	He has already come. (combined le)
	Gēge xiànzài niàn dàxué le.	Older brother goes to college now. (new-situation le) ^a
State	Tā xiànzài huì xiě zì le.	He can write now. (new-situation le)
Process	Tā zuótān bìng le.	He got sick yesterday. (completion le)
	Tā xiànzài bìng le.	He is sick. (combined le)
	Tā bìngle yíge yuē le.	He has been sick for one month now. (new-situation le and completion le)

^aIn affirmative sentences containing action verbs, the marker le for new situations is used to describe a change in a general habit.

Verbs		
Action	State	Process

⁶Most of the time you can figure out from a verb's meaning the semantic category in which that verb belongs. However, process verbs may not be so predictable.

	bù	X	X	
Negation	—negation of completion le	X		X
	—negation of combined le	X		X

Examples:

Action	Tā bù niàn shū.	He doesn't (isn't going to) study
Action	Tā méi niàn shū.	He didn't study.
Action	Tā hái méi niàn shū.	He hasn't studied yet,
State	Tā qūnián bù xiǎng niàn shū.	Last year, she didn't want to study.
Process	Tā jīntiān méi bìng.	He is not sick today.
Process	Tā hái méi hǎo.	He hasn't yet recovered.

Notice that only action verbs use the whole range of negatives to mark the negative of future or present action, completed action, or new situations. State verbs use the negative prefix **bù** even when referring to past states. Process verbs use the negative prefix **méi** even when referring to something in the present.

If you find a verb occurring with a negative or an aspect marker you had not expected, you might discuss with your teacher how the verb behaves in terms of these charts. You might discover that what you thought was a state verb is actually a process verb, or vice versa.

Notes on №9

9. A: Jīntiān hǎo le méiyou? 今天好了沒有? Are you better today? (Are you recovered?)
 B: Jīntiān hǎo le. 今天好了。 Today I'm better.

Jīntiān hǎo le.: **Hǎo** is one of many state verbs which can become process verbs. When such a verb becomes a process verb, it takes on a different meaning. While the state verb **hǎo** means "to be good" or "to be well," the process verb **hǎo** means "to get better," "to recover." Compare these sentences:

Tā hǎo.	He's in good health.
Tā zuótīan bìng le. Tā jīntiān yǐjīng hǎo le.	Yesterday he became sick. Today he is already recovered.

The difference between the state verb **hǎo** and the process verb **hǎo** is even more evident in negative sentences. State verbs, as you remember, are made negative only with **bù**. Process verbs are made negative only with **méi** or **hái méi**.

Tā bù hǎo.	He's not good. [He's not a good person.]
Tā hái méi hǎo.	He hasn't yet recovered. [He is still sick.]

It can be difficult to remember that **bìng** and **hǎo**, sometimes translated as "to be sick" and "to be better," are actually process verbs in Chinese, not state verbs.

The English sentence "I am better (recovered)" translates as **Wǒ hǎo le.** ("I have become well") and would be incorrect without the **le**.

Jīntiān hǎo le méiyou? Questions may be formed from statements containing completion **le** or combined **le** by adding **méiyou** at the end of the statements.

You will learn more about forming questions in the first unit of the next module.

Tā láile méiyou?	Did he come?
Nǐ hǎole méiyou?	Are you recovered (from your illness)?

Reference Notes

Notes on № 1

1.	A:	Zhèli yǒu Yǐngwén bào ma?	这里有英文报吗？	Are there any English-language newspapers here?
	B:	Yǒu. Jiù zài nàli.	有。就在那里	Yes. They're right over there.

Zhèli yǒu: The Chinese verb **yǒu** sometimes means "to have" and sometimes means "to be" in the sense of "to exist". In exchange 1, **yǒu** has the latter meaning. With this meaning, it often translates into English as "there is/are."

Topic-comment sentences: The subject of a Chinese sentence need not be the person who performs an action or experiences a state. Often, the relationship between the subject and the rest of the sentence is looser and can be analyzed as topic-comment.

A topic is a word or phrase at the beginning of a sentence which sets the scene for the rest of the sentence. The topic is a starting point for understanding a sentence, giving background information and establishing the perspective for listeners. For this reason, time and place phrases are often used as topics.

Xhèli	yǒu	Yǐngwén báo.
Here	there are	English-language newspapers.

A comment is the rest of the sentence which follows the topic. Here are some examples:

		He has a pen; he doesn't have paper. (literally, "Pen he has; paper he doesn't")
A:		Where are you calling from?
B:		Taiwan University
		As for this map, they sell it for ten dollars.

Clearly, the last two examples are meaningful only when the relationship between the initial nouns/pronouns and verbs is understood to be one of topic-comment, not the usual subject-predicate relation of actor-action.

While there is no single rule that tells you when to use topic-comment sentences in Chinese, some helpful generalizations can be made. These generalizations will be discussed as example-sentences appear in the Reference lists.

Jiù zài nàli, "They are right over here": You have learned **jiù** as "only," a synonym of **zhǐ**. In exchange 1, you see another use of **jiù**: "right," "exactly," "precisely."

This word is often used to describe "right" where something is, and is followed by **zài**, "in/on."

Notes on № 2

2.	A:	Zhèli yǒu Yīngwén bào meiyou?	这里有英文报没有？	Are there any English-language newspapers here?
	B:	Yǒu. Jiù zài nàli.	有。就在那里。	Yes. They're right there.

Yǒu...méiyǒu: The first sentence in exchange 2 is a yes/no-choice question. This type of question is formed "by explicitly offering the listener a choice between an affirmative and a negative answer. The negative alternative is tacked onto the end of the sentence. Similar questions exist in English. But the English question would be an impatient one, while the Chinese question is an ordinary one:

Zhèli yǒu Yīngwén bào méiyou?

Are there say English-language newspaper here, or aren't there?

Neutral tones: Whether or not a syllable is pronounced in the Neutral tone often depends on the speed of speech and the mood the speaker is trying to convey. In informal conversation between native speakers, there are many more Neutral tones than in the more careful, deliberate speech of a language teacher speaking to foreign student. (Bear this point in mind when you find a discrepancy between the textbook marking of a word and the pronunciation of that word on tape.)

Most syllables in any stretch of spoken Chinese are neither completely "Neutral" (i. e., with no audible change in pitch for the duration of the syllable) nor completely "full" in length and amplitude. These syllables will usually be somewhere in between the two extremes.

Zhèli yǒu Yīngwen bào meiyou? Are there any English-language newspapers here?

Zhěli yǒu Yīngwén bào méiyou"?

Often a syllable will not Bound like a full tone. But if you ask "Then is this syllable in the Neutral tone?" the answer will be "No, not exactly." There is no distinct dividing line between a syllable with a tone and a syllable in the Neutral tone. Very often, the most helpful answer to the question "Should this be pronounced in the Neutral tone?" is "Pronounce it the way you hear it." The language is taught in terms of four tones, but your ears hear more.

Notes on № 3

3.	A:	Wǒ xiǎng mǎi Yīng-wén bào.	我想买英文报。	I would like to buy English-language newspaper.
	B:	Hǎo. Jiù zài zhèli.	好。就在那里。	Fine. They're right here.

The auxiliary verb **xiǎng** is sometimes translated as "would like to" or "to want to." Here are some examples of translations you have learned for **xiǎng**:

Wǒ xiǎng mǎi Yīngwén bào.	I'm thinking of buying an English-language newspaper. OR I would like to buy an English-language newspaper. OR I want to buy an English-language newspaper.
Wǒ xiǎng tā xiǎng míngtiān zǒu.	I think he is planning to leave tomorrow.
Wǒ hěn xiǎng niàn shú.	I very much want to study.
Wǒ bù tài xiǎng qù.	I don't want to go very much. ("tài" meaning "too," "excessively," appears in Unit 3)

Notes on № 4

4.	A:	Zhège duōshao qián?	这个多少钱？	How much is this one?
	B:	Wǔkuài qián.	五块钱。	Five dollars.

Zhège duōshao qián? In Chinese sentences that ask for and give prices, the word **shì** is usually omitted.

shì reappears, however, in negative and contrastive sentences: **Zhège bù shì sìkuài qián, shì wǔkuài qián.** "This (item) isn't four dollars; it's five dollars."

Wǔkuài qián literally means "five dollars money." The counter **-kuài**, "dollars," indicates the units of the general class "money" that are being counted (i.e., dollars as opposed to cents.)

Notes on № 5

5.	A:	Zhège Zhōngwén bào duōshao qián?	这个中文报多少钱？	How much is the Chinese-language newspaper?
	B:	Sānkuài qián yífèn.	三块钱一份。	Three dollars a copy.

Notice in the sentence **Zhège Zhōngwén bào duōshao qián?** that the general counter **-ge** is used rather than the specific counter **-fèn**, "copy." The counter **-ge** is often used in talking about the KIND of thing. In this case the question is about the price of a newspaper as a publication, not about the price of a copy. The specific counter would be used to talk about a particular concrete object, as in a sentence like: "This copy of the China Post is torn."

Yífèn: In Chinese, when you talk about the unit price of an item, the unit is a counter. Notice that **yífèn** comes at the end of the sentence, just as "copy" does in English.

Notes on № 6

6.	A:	Nǐmen zhèli mài Měiguó zázhì bu mài?	你们这里卖美国书 不卖？	Do you sell American magazines here?
	B:	Mài. Wǒmen zhèli mài.	卖。我们这里卖。	Yes, we sell them here.

Mài, "to sell," differs from the word mǎi, "to buy," only in its tone.

Nǐmen zhèli, "your place here," literally, "you here": Use Nǐmen zhèli when talking to someone who represents a stores a bank, or other institutions. By putting zhèli (zhèr), "here," or nàli (nàr), "there," after a person's name or a pronoun, you make a phrase referring to a place associated with the person. For example, nì nàli means "over there where you are now," and wǒ zhèli means "here where I am now." Use these phrases when you want to express the idea of an item being close to a person (not necessarily ownership).

Nǐ nàli yǒu bì méiou? Do you have a pen over there? (i.e., Is there a pen over there where you are?)

This kind of phrase is also used to mean a person's home: nǐ nàli, "your place" (used when the speaker is not at "your house"); wǒ zhèli: "my place" (used when the speaker is at home.)

A: Chén xǎojiě zài nàli? Where is Miss Chén?

B: Tā zài Liú tàitài nàli She is at Mrs. Liú house.

Nǐmen zhèli mài Měiguó zázhì bu mài? In this sentence, Nǐmen zhèli is used as a topic. Literally, the sentence means: "As for your place here, are American magazines sold?"

Notes on № 7

7.	A:	Zhège duōshao qián?	这个多少钱？	How much is this one?
	B:	Sānshikuài qián yìběn.	三十块钱一本。	Thirty dollars a copy.
	A:	Hǎo, wǒ mǎi yìběn.	好。我买一本。	Fine, I'll buy one.

The counter běn, "volume", "copy," is used for both books and magazines.

Notes on № 8

8.	A:	Nǐmen zhèli yǒu Měiguó shū meiyou?	你们这里有美国书 没有？	Do you have American books here?
	B:	Duìbuqǐ, Měiguó shū wǒmen bú mài.	对不起， 美国书我们不 卖。	I'm sorry, we don't sell American books here.

Duìbuqǐ, literally means "unable to face (you)." This word is used to say "I'm sorry" when you bump into a person, arrive late, and so on. It is not the word

for "I'm sorry" when you sympathize with someone else's misfortune (e.g., when a relative dies.)

Měiguó shū wǒmen bú mài.: In this sentence, **Měiguó shū**, the object of the verb **mài**, occurs at the beginning, in topic position. Here the order of the sentence element is : topic - subject - verb. Some speakers of English use the same word order. Compare:

Měiguó shū	wǒmen	bú mài.
American books	we	don't sell.

Notice that **bú mài** is not the ending of a yes/no-choice question. The phrase keeps its tones in this sentence.

Notes on № 9

9.	A:	Bào, zázhì, yígòng duōshao qián?	报杂志一共多少钱？	How much are the newspaper, the magazine altogether?
	B:	Bào wǔkuài, zázhì sānshikuài.	报五怪；杂志三十块。	The newspaper is five dollars; the magazine is thirty dollars.
	B:	Yígòng sānshiwǔkuài qián.	一共三十五块钱。	Altogether, it's thirty-five dollars.

Yígòng, "altogether,": In totaling something up, the items being totaled begin the sentence, in topic position, and are followed by the adverb **Yígòng**.

Notes on № 10-11

10.	A:	Nǐmen zhèli mài dìtú bu mài?	你们这里卖地图不卖？	Do you sell maps here?
	B:	Mài. Zài nàli.	卖。在那里。	We do. They are other here.
11.	A:	Nín xiǎng mǎi shénme dìtú?	您想买什么地图？	What kind of map would you like to buy?
	B:	Wǒ xiǎng mǎi yìzhāng Táibēi dìtú.	我想买一张台北地图。	I would like to buy a map of Taipei.

shénme dìtú literally means "what map?." In exchange 11, this phrase is used to mean "what kind of map."

yìzhāng: the counter **-zhāng** is used for flat objects. Literally, **yìzhāng Táibēi dìtú** means "one sheet Taipei map." In exchange 11, the phrase is translated as "a map of Taipei."

Notes on № 12

12.	A:	Zhèzhāng Táibēi dìtú duōshao qián?	这张台北地图多少钱？	How much is this map of Taipei?
-----	----	---	------------	---------------------------------

B:	Shíèrkuài qián.	十二块钱。	Twelve dollars.
----	-----------------	-------	-----------------

Zhèzhāng dìtú: compare the two phrases which follow.

zhè		-zhāng	dìtú	this map
zhè	liǎng	-zhāng	dìtú	these two maps

In the first phrase, the counter **-zhāng** does not have a number in front of it. In effect, the number 1 was dropped after the specifier **zhè**. Notice that when a specifier and a number occur together in Chinese, the word order is just like English: **Zhè liǎngzhāng dìtú**, "these two maps."

13.	yífèn (r) bàozhǐ	one newspaper
14.	yìzhī bì	one pen
15.	yìzhāng zhǐ	one piece of paper
16.	yìběn zìdiǎn	one dictionary
17.	Hàn-Yīng zìdiǎn	Chinese-English dictionary
18.	Yīng-Hàn zìdiǎn	English-Chinese dictionary
19.	huàxué	chemistry
20.	shùxué	mathematics

Notes on additional required vocabulary:

bàozhǐ and **bào**, two words for "newspaper," are interchangeable.

Yìzhī bì: The counter for pens, **-zhī**, is the counter for straight, stick-like objects.

Hàn-Yīng zìdiǎn, **Yīng-Hàn zìdiǎn**: The word for "Chinese" in these expressions comes from the Han Dynasty (206 B.C. to A.D. 219.) **Hàn** is often used in titles to refer to the Chinese people and their language.
